

# AAPG | BULLETIN

VOLUME 105 • NUMBER 7 • JULY 2021

## REGULAR FEATURES

**Previews** ..... ii  
**Staff Editors** ..... iii  
**Association** ..... iv  
**House of Delegates** ..... vi  
**Electronic Submission** ..... 1382  
**Instructions to Authors** ..... 1510

**ON COVER** – The thick outcrop of the lower Cambrian organic rich shale in the Yiyang County, southern China. See related paper by Tan et al., p. 1329, this issue of the *Bulletin*.

## ARTICLES

*Sequence stratigraphy of the Niobrara Formation: Implications for age-constraining tectonic events and stratigraphic complexities in the Denver-Julesburg Basin, United States*  
**William R. Drake and Sarah J. Hawkins** ..... 1293

*Depositional environment and hydrothermal controls on organic matter enrichment in the lower Cambrian Niutitang shale, southern China*  
**Jingqiang Tan, Zhanghu Wang, Wenhui Wang, Jason Hilton, Jianhua Guo, and Xikai Wang** ..... 1329

*Rock classification in the Eagle Ford Formation through integration of petrophysical, geological, geochemical, and geomechanical characterization*  
**Shahin Amin, Matthew Wehner, Zoya Heidari, and Michael M. Tice** ..... 1357

*Comparison of gas, Klinkenberg, and liquid permeability of sandstone: Flow regime and pore size*  
**Tobias Orlander, Harald Milsch, and Ida Lykke Fabricius** ..... 1383

*Deeper-water deposition in intrashelf basins: Example from the Lower Cretaceous (Albian) upper Glen Rose Formation in the Houston trough, eastern Texas*  
**Peter Soto-Kerans, Robert G. Loucks, and Charles Kerans** ..... 1405

*Characteristics and origin of oil and gas in the Nanpu sag, Bohai Bay Basin, China: Insights from oil-source correlation and source rock effects*  
**Gang Gao, Jianyu Zhao, Shangru Yang, Wenzhe Gang, Yuexia Dong, and Zhongxin Zhao** ..... 1435

*Lithological, petrophysical, and seal properties of mass-transport complexes, northern Gulf of Mexico*  
**Nan Wu, Christopher A.-L. Jackson, Howard D. Johnson, and David M. Hodgson** ..... 1461

*Surface fractal analysis of pore structure of tight sandstones: Comparison of different models based on mercury intrusion porosimetry*  
**Wenchao Dou, Luofu Liu, Zhengjian Xu, Mengyao Wang, Yiting Chen, and Ximeng Wang** ..... 1491

### ACKNOWLEDGMENTS—

AAPG thanks the AAPG Foundation for financial support of this issue of the *Bulletin*.

The AAPG Editor thanks the following reviewers for their work on papers in this issue: Thomas Algeo, Shuvajit Bhattacharya, Kent Bowker, Ian Clark, William D. DeMis, Ling Gao, Ping Gao, Ursula Hammes, Qinzhong Hu, Gregory S. Hurd, Fujie Jiang, Shaina Kelly, Jin Lai, Manuel Maria Mahamud Lopez, Dawei Lv, Andrew Madof, Mianmo Meng, Siddharth Misra, Lorena Moscardelli, Brad Prather, Derek Sawyer, Carl Steffensen, Xianglu Tang, Lowell Waite, Min Wang, and Jinyu Zhang.
