An introduction to chert reservoirs of North America
James P. Rogers and Mark W. Longman

Contrasting styles of reservoir development in proximal and distal chert facies: Devonian Thirtyone Formation, Texas
Stephen C. Ruppel and Roger J. Barnaby

Reservoir characteristics of Devonian cherts and their control on oil recovery: Dollarhide field, west Texas
Arthur Saller, Brian Ball, Steve Robertson, Bruce McPherson, Clay Wene, Robert Nims, and John Gogas

A Devonian hydrothermal chert reservoir: the 225 bcf Parkland field, British Columbia, Canada
Jeffrey J. Packard, Ihsan Al-Aasm, Iain Samson, Zeev Berger, Robert Nims, and John Gogas

Characterization of the Mississippian chert in south-central Kansas
W. Lynn Watney, Willard J. Guy, and Alan P. Byrnes

Deposition and diagenesis of Mississippian chert reservoirs, north-central Oklahoma
Suzanne M. Rogers

Unconformity-related chert/dolomite production in the Pennsylvanian Amsden Formation, Wolf Springs fields, Bull Mountains basin of central Montana
Glen A. Luebking, Mark W. Longman, and W. Joseph Carlisle

Density and mineralogy variations as a function of porosity in Miocene Monterey Formation oil and gas reservoirs in California
Caren Chaika and Loretta Ann Williams

Monterey Formation porcelanite reservoirs of the Elk Hills field, Kern County, California
S. A. Reid and J. L. McIntyre

ACKNOWLEDGEMENTS—AAPG thanks the Aapg Foundation, Occidental of Elk Hills, Inc. and Unocal Corporation for financial support to this issue of the Bulletin.
