ON COVER — Multicolored series of interbedded mudstones, sandstones, and carbonates with a slaty cleavage on the shores of the Barents Sea in northernmost Norway. The series is known as the Båtsfjord Formation and forms part of the late Proterozoic Barents Sea Group in the northern Varanger Peninsula, Finnmark. The layers were probably deposited on tidal flats associated with Cryogenian carbonate platforms. Photo by Haakon Fossen.

GEOLOGIC NOTE
Geologic analysis of the Upper Jurassic Haynesville Shale in east Texas and west Louisiana
Ursula Hammes, H. Scott Hamlin, and Thomas E. Ewing .......................... 1643

ARTICLES
Salt tectonics in the western Gulf of Cadiz, southwest Iberia
Hugo Matias, Pedro Kress, Pedro Terrinha, Webster Mohriak, Paulo T. L. Menezes, Luis Matias, Fernando Santos, and Frode Sandnes ................. 1667
Prediction of lithofacies and reservoir quality using well logs,
Late Cretaceous Williams Fork Formation, Mamm Creek field,
Piceance Basin, Colorado
Aysen Ozkan, Stephen P. Cumella, Kitty L. Milliken, and Stephen E. Laubach .......... 1699
Overpressure and mudrock compaction in the Lower Kutai Basin, Indonesia: A radical reappraisal
Agus M. Ramdhan and Neil R. Goulty .................................................. 1725
Partial dolomitization of a Pennsylvanian limestone buildup by hydrothermal fluids and its effect on reservoir quality and performance
Arthur H. Saller and John A. (Tony) D. Dickson ........................................ 1745
The sequence stratigraphy of Mesozoic successions in the Levant margin, southwestern Israel: A model for the evolution of southern Tethys margins
Michael Gardosh, Paul Weimer, and Akiva Flexer ...................................... 1763
On-shelf lower Miocene Oakville sediment-dispersal patterns within a three-dimensional sequence-stratigraphic architectural framework and implications for deep-water reservoirs in the central coastal area of Texas
Robert G. Loucks, Brian T. Moore, and Honglu Zeng .................................. 1795
