Stable-isotope chemostratigraphy as a tool to correlate complex Mississippian marine carbonate facies of the Anadarko shelf, Oklahoma and Kansas
Jesse T. Koch, Tracy D. Frank, and Thomas P. Bulling

Effects of smectite on the oil-expulsion efficiency of the Kreyenhagen Shale, San Joaquin Basin, California, based on hydrous-pyrolysis experiments
Michael D. Lewan, Michael P. Dolan, and John B. Curtis

Porosity trends in the Skagerrak Formation, Central Graben, United Kingdom Continental Shelf: The role of compaction and pore pressure history
Neil T. Grant, Alexander J. Middleton, and Stuart Archer

Time-dependent subsidence associated with drainage-induced compaction in Gulf of Mexico shales bounding a severely depleted gas reservoir
Chandong Chang, Ellen Mallman, and Mark Zoback

Fault displacement gradients on normal faults and associated deformation
Alan P. Morris, Ronald N. McGinnis, and David A. Ferrill

Diagenesis and porosity development in the First Eocene reservoir at the giant Wafra Field, Partitioned Zone, Saudi Arabia and Kuwait
Arthur H. Sailer, David Pollitt, and J. A. D. Dickson

Cenozoic fault systems in southwest Qaidam Basin, northeastern Tibetan Plateau: Geometry, temporal development, and significance for hydrocarbon accumulation
Lei Wu, Ancheng Xiao, Dade Ma, Hongge Li, Bo Xu, Ya Shen, and Liguang Mao

Cracking, mixing, and geochemical correlation of crude oils, North Slope, Alaska
Ye Wang, Kenneth E. Peters, J. Michael Moldowan, Kenneth J. Bird, and Leslie B. Magoon
