PREFACE

Robert C. Liebermann and Donald G. Isaak
Dedication to Orson L. Anderson 269

ARTICLES

Anastasia Chopelas
Thermal expansivity of mantle relevant magnesium silicates derived from vibrational spectroscopy at high pressure 270

Koji Masuda, Dave Erskine, and Orson L. Anderson
Differential laser-interferometer for thermal expansion measurements 279

W.A. Bassett, H.-J. Reichmann, R.J. Angel, H. Spetzler, and J.R. Smyth
New diamond anvil cells for gigahertz ultrasonic interferometry and X-ray diffraction 283

Ichiro Ohno, Makoto Abe, Masaki Kimura, Yoichi Hanayama, Hitoshi Oda, and Isao Suzuki
Elasticity measurement of silica glass under gas pressure 288

Baosheng Li and Robert C. Liebermann
Sound velocities of wadsleyite β-(Mg0.88Fe0.12)2SiO4 to 10 GPa 292

Jennifer M. Jackson, Stanislav V. Sinogeikin, and Jay D. Bass
Sound velocities and elastic properties of γ-Mg2SiO4 to 873 K by Brillouin spectroscopy 296

Isao Suzuki, Ichiro Ohno, and Orson L. Anderson
Harmonic and anharmonic properties of spinel MgAl2O4 304

Masanori Matsui, Stephen C. Parker, and Maurice Leslie
The MD simulation of the equation of state of MgO: Application as a pressure calibration standard at high temperature and high pressure 312

B.B. Karki, W. Duan, C.R.S. da Silva, and R.M. Wentzcovitch
Ab initio structure of MgSiO3 ilmenite at high pressure 317

Juichiro Hama, Kaichi Suito, and Orson L. Anderson
Thermoelasticity of silicate perovskites and magnesiowüstite and its implications for the Earth’s lower mantle 321

Peter I. Dorogokupets
Thermodynamic functions at zero pressure and their relation to equations of state of minerals 329

Ronald E. Cohen, Oguz Gülseren, and Russell J. Hemley
Accuracy of equation-of-state formulations 338

Frank D. Stacey and Donald G. Isaak
Extrapolation of lower mantle properties to zero pressure: Constraints on composition and temperature 345
