Contents

Z. Chen, K.G. Osadetz, J. Davidson and M. Dawson
Introduction to a Special Issue on Petroleum Resource Assessment Methods and Case Studies ........................................ Page 93

P. Hannigan
An assessment of conventional petroleum resource of the Mackenzie Corridor, northern mainland, Canada: A case study .................................................................................. Page 97

K.C. Hood, D.A. Yurewicz and K.J. Steffen
Assessing continuous resources – building the bridge between static and dynamic analyses................................. Page 112

K.F. Forbes and E.M. Zampelli
The economic environment and the growth in reserves from known gas fields in the Gulf of Mexico............................... Page 134

Z. Chen, Y. Liu and K. Osadetz
Geological risk evaluation using the Support Vector Machine with examples from the late Triassic–early Jurassic structural play in western Sverdrup Basin, Canadian Arctic Archipelago ........................................ Page 142

C. Liu, J. Zhu, S. Wang and W. Liu
Oil production forecasts and their uncertainty analyses....... Page 158

C. Zou, Q. Guo, J. Wang and H. Xie
A fractal model for hydrocarbon resource assessment with an application to the natural gas play of volcanic reservoirs in Songliao Basin, China ........................................ Page 166

Q. Guo, X. Li, C. Zou, J. Hu and N. Chen
Predicting the distribution of the tight sandstone gas in the Hechuan play, Sichuan Basin, China.......................... Page 186

A statistical method for determining the hydrocarbon accumulation coefficient and its application to assessment of hydrocarbon resources in Huanghekou Sag, Bohai Bay Basin, Eastern China ................................................................. Page 200

J. Zhenxue, P. Xiongqi, L. Zhuo, Z. Jingjing, W. Li, L. Xiaolei and Z. Yingying
An improved multi-parameter-constrained Pareto model for hydrocarbon resource assessment and its application in Bozhong Sag, Eastern China ......................................................... Page 209

W. Zhixin, Z. Guanghui, P. Lin’an and T. Wenlian
An oil and gas resource reassessment of the Bonaparte Basin, northwest shelf of Australia ........................................ Page 218
