

Become a member of **SSA** !

Membership includes so many great benefits:

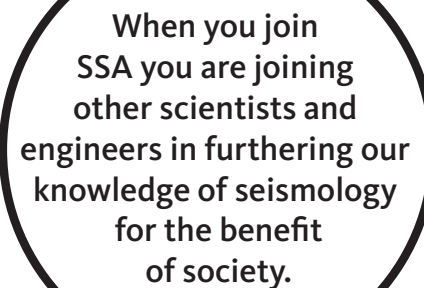

- Full online access to *BSSA* and *SRL*, including archives dating back to the early 1900's
- Discounted registration to the Annual Meeting, the leading forum for international seismological research
- An international network of seismologists and engineers
- Access to years of presentations from previous Annual Meetings
- Eligibility for our travel grants, honors, and so much more

First organized during the aftershocks of the 1906 San Francisco earthquake, the Seismological Society of America has become the premier forum for assembling, exchanging and sharing the knowledge essential for an earthquake-aware world.

As a member, you'll have access to world-class scientific research and professional development opportunities. Your membership helps SSA communicate earthquake science to the public and provide sound science on seismic risk to government and industry officials.

By joining SSA you are becoming part of an international society that brings together basic research, applied science and public policy in one dynamic community.

To become a member of SSA and join other scientists and engineers in providing a strong voice for seismology, please visit <https://www.seismosoc.org/membership/>.

When you join
SSA you are joining
other scientists and
engineers in furthering our
knowledge of seismology
for the benefit
of society.
