Contents

Review Article
Topographic Slope as a Proxy for Seismic Site Conditions and Amplification  
David J. Wald and Trevor I. Allen 1379

Articles
Downhole Receiver Function: A Case Study  
Kurang Mehta, Roel Snieder, and Vladimir Graizer 1396

Automatic Zonation of Urban Areas Based on the Similarity of H/V Spectral Ratios  
P. L. Bragato, G. Laurenzano, and C. Barnaba 1404

Comparison of Empirical and Numerical Site Responses at the Tito Test Site, Southern Italy  
S. Parolai, M. Mucciarelli, M. R. Gallipoli, S. M. Richwalski, and A. Strollo 1413

Seismic Amplification within the Seattle Basin, Washington State: Insights from SHIPS Seismic Tomography Experiments  
Catherine M. Snelson, Thomas M. Brocher, Kate C. Miller, Thomas L. Pratt, and Anne M. Trehu 1432

Basin Structure beneath the Santa Rosa Plain, Northern California: Implications for Damage Caused by the 1969 Santa Rosa and 1906 San Francisco Earthquakes  

Excitation of Surface Waves in the Valley of Mexico  
Masahiro Iida 1458

An Analysis of the $M_w$ 4.7 Jabalpur, India, Earthquake of 16 October 2000: Toward Ground-Motion Estimation in the Region from Future Events  

Quantitative Classification of Near-Fault Ground Motions Using Wavelet Analysis  
Jack W. Baker 1486

Near-Fault Peak Ground Velocity from Earthquake and Laboratory Data  
A. McGarr and J. B. Fletcher 1502

Beyond $S_{GMRot}$: Conversion to $S_{Gm}$, $S_{ASV}$, and $S_{Gmax}$  
Jennie A. Watson-Lamprey and David M. Boore 1511

Orientation-Dependent Ground-Motion Measure for Seismic-Hazard Assessment  
H. P. Hong and K. Goda 1525

© indicates that online material is available in the electronic edition of BSSA
A Record-Based Method for the Generation of Tridirectional Uniform Hazard-Response Spectra and Ground Motions Using the Hilbert-Huang Transform

Ping Gu and Y. K. Wen

Optimally Accurate Nearly Analytic Discrete Scheme for Wave Field Simulation in 3D Anisotropic Media

Dinghui Yang, Guojie Song, and Ming Liu

Accurate Calculation of Fault-Rupture Models Using the High-Order Discontinuous Galerkin Method on Tetrahedral Meshes

Martin Käser, P. Martin Mai, and Michael Dumbser

Validation of the Intensity-Based Source Inversions of Three Destructive California Earthquakes

Franco Pettenati and Livio Sirovich

Subsidence, Compaction, and Gravity Sliding: Implications for 3D Geometry, Dynamic Rupture, and Seismic Hazard of Active Basin-Bounding Faults in Southern California

Craig Nicholson, Marc J. Kamerling, Christopher C. Sorlien, Thomas E. Hopps, and Jean-Pierre Gratier

Moho Depth and Crustal $V_p/V_s$ Variation in Southern Korea from Teleseismic Receiver Functions: Implication for Tectonic Affinity between the Korean Peninsula and China

Sung-Joon Chang and Chang-Eob Baag

Postearthquake Relaxation and Aftersack Accumulation Linearly Related after the 2003 $M_{6.5}$ Chengkung, Taiwan, and the 2004 $M_{6.0}$ Parkfield, California, Earthquakes

J. C. Savage and S.-B. Yu

Paleoseismological Evidence of Recent Earthquakes on the 1967 Mudurnu Valley Earthquake Segment of the North Anatolian Fault Zone

Nikolaos Palyvos, Daniela Pantosti, Cengiz Zabci, and Giuliana D'Addezio

Late Quaternary Paleoseismology of the Southern Steens Fault Zone, Northern Nevada

Stephen F. Personius, Anthony J. Crone, Michael N. Machette, Shannon A. Mahan, Jai Bok Kyung, Hector Cisneros, and David J. Lidke

Recurrence Time Distributions of Large Earthquakes in a Stochastic Model for Coupled Fault Systems: The Role of Fault Interaction

G. Zöller and S. Hainzl

Seismic-Hazard Disaggregation: A Fully Probabilistic Methodology

Marco Pagani and Alberto Marcellini

Probabilistic Seismic-Hazard Assessment for Portugal

Susana P. Vilanova and Joao F. B. D. Fonseca

The Seismic Alert System for Mexico City: An Evaluation of Its Performance and a Strategy for Its Improvement

A. Iglesias, S. K. Singh, M. Ordaz, M. A. Santoyo, and J. Pacheco

A Mathematical Statistics Formulation of the Teleseismic Explosion Identification Problem with Multiple Discriminants

Short Notes

Applying a Change-Point Detection Method on Frequency-Magnitude Distributions

Daniel Amorèse
An Empirical Procedure for Rapid Magnitude Estimation in Italy

M. Olivieri and J. Schweitzer

Nonlinear Crustal Corrections for Normal-Mode Seismograms

Bogdan Kustowski, Adam M. Dziewoński, and Göran Ekström

Comment and Reply

Comment on “Layered Seismogenic Source Model and Probabilistic Seismic-Hazard Analyses in Central Italy” by Bruno Pace, Laura Peruzza, Giusy Lavecchia, and Paolo Boncio

Warner Marzocchi

Reply to “Comment on ‘Layered Seismogenic Source Model and Probabilistic Seismic-Hazard Analyses in Central Italy’ by Bruno Pace, Laura Peruzza, Giusy Lavecchia, and Paolo Boncio” by Warner Marzocchi

L. Peruzza, B. Pace, G. Lavecchia, and P. Boncio

Erratum

Erratum to “Relationships between Median Values and between Aleatory Variabilities for Different Definitions of the Horizontal Component of Motion”

Katrin Beyer and Julian L. Bommer
