

Clays and Clay Minerals

Volume 50 Number 3 June 2002

Contents

Hydrothermal synthesis of Zn-smectites <i>Shoji Higashi, Kazuhiko Miki and Sridhar Komarneni</i>	299
Infrared evidence of dioctahedral-trioctahedral site occupancy in palygorskite <i>A. Chahi, S. Petit and A. Decarreau</i>	306
<i>In situ</i> characterization and differentiation of kaolinites in lateritic weathering profiles using infrared microspectroscopy <i>Anicet Beauvais and Jacques Bertaux</i>	314
Intercalation of benzamide into expanded kaolinite under ambient environmental conditions <i>B. P. Kelleher and T. F. O'Dwyer</i>	331
Effects of oxyanions on the EDTA-promoted dissolution of goethite <i>Jillian L. Campbell and Matthew J. Eick</i>	336
Influence of silicate- and magnesium-specific adsorption and particle shape on the rheological behavior of mixed serpentine-goethite suspensions <i>P. Tartaj, A. Cerpa, M. T. García-González and C. J. Serna</i>	342
Benzene displacement on imogolite <i>Michael A. Wilson, Garry S. H. Lee and Renee C. Taylor</i>	348
A new method for the prediction of Gibbs free energies of formation of phyllosilicates (10 Å and 14 Å) based on the electronegativity scale <i>Philippe Vieillard</i>	352
Clay mineral changes in the Morrow experimental plots, University of Illinois <i>B. Velde and T. Peck</i>	364
Crystal-size distributions of clays during episodic diagenesis: the Salton Sea geothermal system <i>Jin-wook Kim and Donald R. Peacor</i>	371
Two origins of illite at the Dexing porphyry Cu deposit, East China: implications for ore-forming fluid constraint on illite crystallinity <i>Zhangdong Jin, Jinchu Zhu, Junfeng Ji, Fuchun Li and Xinwei Lu</i>	381
Investigation of the clay fraction (<2 µm) of The Clay Minerals Society reference clays <i>Christoph Vogt, Jörn Lauterjung and Reinhard X. Fischer</i>	388
A new extraction procedure for simultaneous quantitative determination of water-soluble metals in reaction products of clays and inorganic salts <i>Fernando G. Colina, Santiago Esplugas and Jose Costa</i>	401
Report of the Association Internationale pour l'Étude des Argiles (AIPEA) Nomenclature Committee for 2001: order, disorder and crystallinity in phyllosilicates and the use of the "crystallinity index" <i>Stephen Guggenheim, Derek C. Bain, Faiza Bergaya, María F. Brigatti, Victor A. Drits, Dennis D. Eberl, Milton L. L. Formoso, Emilio Galán, Richard J. Merriman, Donald R. Peacor, Helge Stanjek and Takashi Watanabe</i>	406
Forthcoming papers	410

Annual Sustaining Members, Patrons and Benefactors of The Clay Minerals Society

Benefactors

ExxonMobil Upstream Research Co.
Southern Clay Products, Inc.

Patrons

American Colloid Company
ChevronTexaco ERTC
IMERYS Pigments & Additives Group
Thiele Kaolin Company
Nestlé Purina Golden Products Division

Members

Burgess Pigment Company
H. H. Murray and Associates
Kentucky-Tennessee Clay Company
Oil-Dri Corporation of America
Wyo-Ben, Inc.

Individuals

Stephen Guggenheim
Necip Güven
Blair Jones
William F. Moll, Jr.
J. L. White
