Late Paleozoic tropical climate response to Gondwanan deglaciation
Christopher J. Poulsen, David Pollard, Isabel P. Montañez, David Rowley

Gold upgrading in metamorphosed massive sulphide ore deposits: Direct evidence from laser-ablation–inductively coupled plasma–mass spectrometry analysis of invisible gold
Thomas Wagner, Reiner Klemm, Thomas Wenzel, Benny Mattsson

Short-term changes in seafloor character due to flood-derived hyperpycnal discharge: Typhoon Mindulle, Taiwan, July 2004
J.D. Milliman, S.W. Lin, S.J. Kao, J.P. Liu, C.S. Liu, J.K. Chiu, Y.C. Lin

Highstand fans in the California borderland: The overlooked deep-water depositional systems
Jacob A. Covalt, William R. Normark, Brian W. Romans, Stephen A. Graham

Amphibole “sponge” in arc crust?
Jon Davidson, Simon Turner, Heather Handley, Colin Macpherson, Anthony Dosseto

Quantitative model for magma degassing and ground deformation (bradyseism) at Campi Flegrei, Italy: Implications for future eruptions
Robert J. Bodnar, Claudia Cannatelli, Benedetto De Vivo, Anna Maria Lima, Harvey E. Belkin, Alfonso Milia

Age and source constraints for the giant Muruntau gold deposit, Uzbekistan, from coupled Re-Os isotopes in arsenopyrite
Ryan Morelli, Robert A. Creaser, Reimar Seitzmann, Finlay M. Stuart, David Selby, Torsten Graupner

Mesoproterozoic carbon dioxide levels inferred from calcified cyanobacteria
Linda C. Kah, Robert Riding

Cryptic meteoric diagenesis in freshwater bivalves: Implications for radiocarbon dating

Linking granulites, silicic magmatism, and crustal growth in arcs: Ion microprobe (zircon) U-Pb ages from the Hidaka metamorphic belt, Japan

Sediment mixing and stratigraphic disorder revealed by the age-structure of Tellina shells in Great Barrier Reef sediment
Matthew A. Kosnik, Quan Hua, Geraldine E. Jacobsen, Darrell S. Kaufman, Raphael A. Wüst

Mechanically disrupted and chemically weakened zones in segmented dike systems cause vent localization: Evidence from kimberlite volcanic systems
R.J. Brown, J. Kavanagh, R.S.J. Sparks, M. Tait, M. Field

Determination of fault friction from reactivation of abyssal-hill faults in subduction zones
M. Billen, E. Cowgill, E. Buer

Wet and arid phases in the southeast African tropics since the Last Glacial Maximum
Isla S. Castañeda, Joseph P. Werne, Thomas C. Johnson

Physical and chemical evidence of the 1850 Ma Sudbury impact event in the Baraga Group, Michigan

Desert speleothems reveal climatic window for African exodus of early modern humans
Anton Vaks, Miryam Bar-Matthews, Avner Ayalon, Alan Matthews, Ludwik Halciz, Amos Frumkin

Neothyran Late Cretaceous volcanic arc hydrothermal vent fauna
Crispin T.S. Little, Archil G. Magalashvili, David A. Banks

Vulcanian explosion cycles: Patterns and predictability
S.F.L. Watt, T.A. Mathier, D.M. Pyle

Non-Newtonian rheological law for highly crystalline dome lavas
Yan Lavallée, Kai-Uwe Hess, Benoît Cordonnier, Donald Bruce Dingwell

Supercontinent cycles disrupted by strong mantle plumes
Benjamin R. Phillips, Hans-Peter Bunge

Influence of groundwater flow on thermochronometer-derived exhumation rates in the central Nepalese Himalaya
David M. Whipp, J.R., Todd A. Ehlers

Long-range and long-term fault interactions in Southern California
James F. Dolan, David D. Bowman, Charles G. Sammis

Late Holocene strike-slip offset of a subsurface channel interpreted from three-dimensional seismic data, eastern offshore Trinidad
M. David Soto, Paul Mann, Alejandro Escalona, Lesli J. Wood

Research Focus: Paleoseismology: Why can’t earthquakes keep on schedule?
Robert S. Yeats

Cover: Salt-lined mudcracks near Abu Dhabi, United Arab Emirates, formed due to evaporation of groundwater in the exposed space between mud surfaces, which leaves behind a growing mass of salt. The mud areas are approximately 0.5 m across.
