Eocene to present subduction of southern Adria mantle lithosphere beneath the Dinarides
Richard A. Bennett, Sigrún Hreinsdóttir, Goran Buble, Tomislav Bašić, Željko Bačić, Marijan Marjanović, Gabe Casale, Andrew Gendaszek, Darrel Cowan

Development of active low-angle normal fault systems during orogenic collapse: Insight from Tibet
Paul Kapp, Michael Taylor, Daniel Stockli, Lin Ding

Caribbean coral tracks Atlantic Multidecadal Oscillation and past hurricane activity
Steffen Hetzinger, Miriam Pfeiffer, Wolf-Christian Dullo, Noel Keenlyside, Mojib Latif, Jens Zinke

Highstand transport of coastal sand to the deep ocean: A case study from Fraser Island, southeast Australia
Ron Boyd, Kevin Ruming, Ian Goodwin, Marianne Sandstrom, Claudia Schroder-Adams

Genetic ages for Quaternary topographic evolution: A new dating tool
Dave Craw, Chris Burridge, Richard Norris, Jon Waters

Meander cutoff and the controls on the production of oxbow lakes
José Antonio Constantine, Thomas Dunne

Experimental study of the behavior of copper and zinc in a boiling hydrothermal system
Hiroki Nagaseki, Ken-Ichiro Hayashi

Using titanomagnetite textures to elucidate volcanic eruption histories
Michael B. Turner, Shane J. Cronin, Robert B. Stewart, Mark Bebbington, Ian E.M. Smith

Discrepancy between mineral residence time and soil age: Implications for the interpretation of chemical weathering rates
Kyungsoo Yoo, Simon Marius Mudd

Wave-generated tidal bundles as an indicator of wave-dominated tidal flats
ByongCheon Yang, Murray K. Gingras, S. George Pemberton, Robert W. Dalrymple

Why is terrestrial subduction one-sided?
Taras V. Gerya, James A.D. Connolly, David A. Yuen

Scenario for the evolution of atmospheric pCO2 during a snowball Earth
Guillaume Le Hir, Gilles Ramstein, Yannick Donnadieu, Yves Godderis

Yellowstone plume–continental lithosphere interaction beneath the Snake River Plain
Barry B. Hanan, John W. Shervais, Scott K. Vetter

Mesoproterozoic plate tectonics: A collisional model for the Grenville-aged orogenic belt in the Llano uplift, central Texas
S. Mosher, J.S.F. Levine, W.D. Carlson

Majoritic garnets monitor deep subduction fluid flow and mantle dynamics
M. Scambelluri, T. Pettke, H.L.M. van Roermund

Magmatic degassing histories from apatite volatile stratigraphy
Jeremy W. Boyce, Richard L. Hervig

Basalt weathering rates on Earth and the duration of liquid water on the plains of Gusev Crater, Mars
Elizabeth M. Hausrath, Alexis K. Navarre-Sitchler, Peter B. Sak, Carl I. Steefel, Susan L. Brantley

Thinning of the south dome of Barnes Ice Cap, Arctic Canada, over the past two decades
William A. Sneed, Roger LeB. Hooke, Gordon S. Hamilton

Guayape-Papalutla fault system: A continuous Cretaceous structure from southern Mexico to the Chortis block? Tectonic implications
G. Silva-Romo

Holocene erosion of the Lesser Himalaya triggered by intensified summer monsoon

Using phosphorescence as a fingerprint for the Hope and other blue diamonds
Sally Eaton-Magaña, Jeffrey E. Post, Peter J. Heaney, Jaime Freitas, Paul Klein, Roy Walters, James E. Butler

Quantifying crustal thickness variations in evolving orogens: Correlation between arc basalt composition and Moho depth
G.W. Mantle, W.J. Collins

Hydrothermal circulation in subducting crust reduces subduction zone temperatures
Troy Kummer, Glenn A. Spinelli

Research Focus: Major transformations reveal Earth’s deep secrets
W.L. Griffin

Cover: Waterfalls and desert varnish on sandstone (background) at “The Subway,” Zion National Park, Utah. The varnish is caused by precipitating iron and manganese oxides.
Photo by: Benjamin R. Jordan
Cover design by: Eric Christensen
