Early to Middle Miocene monsoon climate in Australia
N. Herold, M. Huber, D.R. Greenwood, R.D. Müller, and M. Seton

Low marine sulfate concentrations and the isolation of the European epicontinental sea during the Early Jurassic
Robert J. Newton, Eoghan P. Reeves, Nefeli Kafousia, Paul B. Wignall, Simon H. Bottrell, and Jin-Geng Sha

Shifts in the Intertropical Convergence Zone, Himalayan exhumation, and late Cenozoic climate
Howard A. Armstrong and Mark B. Allen

Early Eocene warming events and the timing of terrestrial faunal exchange between India and Asia
Mark Clementz, S. Bajpai, V. Ravikant, J.G.M. Thewissen, N. Saravanan, I.B. Singh, and V. Prasad

Late glacial interhemispheric climate dynamics revealed in South African hyrax middens
Brian M. Chase, Lynne J. Quick, Michael E. Meadows, Louis Scott, David S.G. Thomas, and Paula J. Reimer

Cosmogenic nuclide evidence for enhanced sensitivity of an East Antarctic ice stream to change during the last deglaciation
Duanne A. White, David Fink, and Damian B. Gore

Shrinking of the Colorado Plateau via lithospheric mantle erosion: Evidence from Nd and Sr isotopes and geochronology of Neogene basalts
Ryan Crow, Karl Karlstrom, Yemane Asmerom, Brandon Schmandt, Victor Polyak, and S. Andrew Dufrane

Sea ice-free conditions during the Sturtian glaciation (early Cryogenian), South Australia
Daniel Paul Le Heron, Grant Cox, Anita Trundley, and Alan Collins

Fault lubrication and earthquake propagation in thermally unstable rocks
Nicola De Paola, Takehiro Hirose, Tom Mitchell, Giulio Di Toro, Cecilia Viti, and Toshihiko Shimamoto

Late Neoproterozoic 40° intraplate rotation within Australia allows for a tighter-fitting and longer-lasting Rodinia
Zheng-Xiang Li and David A.D. Evans

Flux rates for water and carbon during greenschist facies metamorphism
Alasdair Skelton

Termination of backarc spreading: Zircon dating of a giant oceanic core complex
Kenichiro Tani, Daniel J. Dunkley, and Yasuhiro Ohara

Shallow-water carbonate record of the Paleocene-Eocene Thermal Maximum from a Pacific Ocean guyot
Stuart A. Robinson

The ups and downs of levees: GPS–based change detection, Middle Mississippi River, USA
Andrew Flor, Nicholas Pinter, and Jonathan W.F. Remo

Fast slip with inhibited temperature rise due to mineral dehydration: Evidence from experiments on gypsum
Nicolas Brantut, Raehee Han, Toshihiko Shimamoto, Nathaniel Findling, and Alexandre Schubnel

Changes in the Indonesian Throughflow during the past 2000 yr
Alicia Newton, Robert Thunell, and Lowell Stott

Melt fracturing and healing: A mechanism for degassing and origin of silicic obsidian
Agustín Cabrera, Roberto F. Weinberg, Heather M.N. Wright, Sergio Zlotnik, and Ray A.F. Cas

Efficient transport of fossil organic carbon to the ocean by steep mountain rivers: An orogenic carbon sequestration mechanism
Robert G. Hilton, Albert Galy, Niels Hovius, Ming-Jame Horing, and Hongye Chen

Synchronized postglacial colonization by magnetotactic bacteria
Öyvind Paasche and Reidar Løvlie

Tectonic blocks in serpentinite mélangé (eastern Cuba) reveal large-scale convective flow of the subduction channel
Idael Francisco Blanco-Quintero, Antonio García-Casco, and Taras V. Gerya

On the relation between fault strength and frictional stability
Matt J. Ikari, Chris Marone, and Demian M. Saffer

Cenozoic migration of topography in the North American Cordillera
Hari T. Mix, Andreas Mulch, Malinda L. Kent-Corson, and C. Page Chamberlain

Precambrian plate tectonics: Seismic evidence from northern Hudson Bay, Canada
Ian D. Bastow, David A. Thompson, James Wooley, J-Michael Kendall, George Helffrich, David B. Snyder, David W. Eaton, and Fiona A. Darbyshire

Focus Article: Metamorphic carbon fluxes: How much and how fast?
Katy Evans

ONLINE FORUMS

Gastropod evidence against the Early Triassic Lilliput effect
e232 COMMENT: M.L. Fraiser, R.J. Twitchett, J.A. Frederickson, B. Metcalfe, and D.J. Bottjer
e233 REPLY: Arnaud Bravard, Alexander Nützel, Andrzej Kaim, Gilles Escarguel, Michael Haughton, Daniel A. Stephen, Kevin G. Bylund, Jim Jenks, and Hugo Bucher
GEOLOGY publishes timely, innovative, and provocative articles relevant to its international audience, representing research from all fields of the geosciences.

GEOLOGY (ISSN 0091-7613 USPS 944-580 CODEN GLGYB) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3880 Fenrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to Geology, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2011 calendar year. GSA Members and Fellows $85 (print + online), $90 (international print + online), $60 (online only). GSA Student and K–12 Teacher Members: $45 (print only, cost for online is included in membership). Nonmembers and Institutions: $575 (print + online). For more details on subscription choices, formats, and pricing, visit www.geosociety.org/pubs/. For member orders, call GSA Sales & Service at +1-800-472-1988. For nonmember orders, contact AIP Customer Service, subs@aip.org or +1-845-247-3692, option 1. Claims for nonreceipt or damaged copies, members should contact GSA Sales & Service, and nonmembers should contact AIP Customer Service. Claims are honored for one year; please allow sufficient delivery time (up to six months) for overseas copies.
