563 Evaluation of controls on silicate weathering in tropical mountainous rivers: Insights from the Isthmus of Panama
Steven T. Goldsmith, Russell S. Harmon, W. Berry Lyons, Brendan A. Harmon, Fred L. Ogden, and Christopher B. Gardner

567 Climate, dust, and fire across the Eocene-Oligocene transition, Patagonia
Peter A. Selkin, Caroline A.E. Strömberg, Regan Dunn, Matthew J. Kohn, Alfredo A. Carlini, K. Siân Davies-Vollum, and Richard H. Maddern

571 Gas-controlled seafloor doming
Stephanie Koch, Christian Berndt, Joerg Bialas, Matthias Haeckel, Gareth Crutchley, Cord Papenberg, Dirk Klaeschen, and Jens Greinert

575 Reaction infiltration instabilities in experiments on partially molten mantle rocks
Matej Pec, Benjamin K. Holtzman, Mark Zimmerman, and David L. Kohlstedt

579 Foreland basin stratigraphic control on thrust belt evolution
James B. Chapman and Peter G. DeCelles

583 Fluid flux melting generated postcollisional high Sr/Y copper-ore-forming water-rich magmas in Tibet
Yong-Jun Lu, Robert R. Loucks, Marco L. Fiorentini, Zhi-Ming Yang, and Zeng-Qian Hou

587 Porphyry-epithermal Au-Ag-Mo ore formation by vapor-like fluids: New insights from geochemical modeling
Nicole C. Hurtig and Anthony E. Williams-Jones

591 Giant Kiruna-type deposits form by efficient flotation of magmatic magnetite suspensions
Jaazyke L. Knipping, Laura D. Bilenker, Adam C. Simon, Martin Reich, Fernando Barra, Artur P. Deditius, Craig Lundstrom, Ilya Bindeman, and Rodrigo Munizaga

595 Long-term changes in precipitation recorded by magnetic minerals in speleothems
Mark D. Bourne, Joshua M. Feinberg, Becky E. Strauss, Ben Hardt, Hai Cheng, Harold D. Rowe, Gregory Springer, and R. Lawrence Edwards

599 The Miocene Galápagos ash layer record of Integrated Ocean Drilling Program Legs 334 and 334: Ocean-island explosive volcanism during plume-ridge interaction

603 Duration and dynamics of the best orbital analogue to the present interglacial
Biagio Giaccio, Eleonora Regattieri, Giovanni Zanchetta, Sebastien Nomade, Paul R. Renne, Courtney J. Sprain, Russell N. Drysdale, Polychronis C. Tzedakis, Paolo Messina, Giancarlo Scardia, Andrea Sposato, and Franck Bassinot

607 Organic carbon burial efficiencies in sediments: The power law of mineralization revisited
Sergei Katsev and Sean A. Crowe

611 Intraplate seismicity in northern Central Europe is induced by the last glaciation
Christian Brandes, Holger Steffen, Rebekka Steffen, and Patrick Wu

615 Archean (3.33 Ga) microbe-sediment systems were diverse and flourished in a hydrothermal context
Frances Westall, Kathleen A. Campbell, Jean Gabriel Bréhéret, Frédéric Foucher, Pascale Gautret, Axelle Hubert, Stéphanie Sorieul, Nathalie Grassineau, and Diego M. Guido

619 A unique isotopic fingerprint of sulfate-driven anaerobic oxidation of methane
Gilad Antler, Alexandra V. Turchyn, Barak Herut, and Orit Sivan

623 The dynamic reference frame of rivers and apparent transience in incision rates
Sean F. Gallen, Frank J. Pazzaglia, Karl W. Wegmann, Joel L. Pederson, and Thomas W. Gardner

627 Boron during meteoric diagenesis and its potential implications for Marinoan snowball Earth δ11B-pH excursions
Joseph A. Stewart, Marcus Gutjahr, Fay Pearce, Peter K. Swart, and Gavin L. Foster

631 Continental rifting and sediment infill in the northwestern Gulf of Mexico
Harm J.A. Van Avendonk, Gail L. Christeson, Ian O. Norton, and Drew R. Eddy

635 Preserved glass-rich impactites on Mars
Kevin M. Cannon and John F. Mustard

639 Hydrological changes facilitated early rice farming in the lower Yangtze River Valley in China: A molecular isotope analysis
Robert Patalano, Zheng Wang, Qin Leng, Weiguo Liu, Yunfei Zheng, Guoping Sun, and Hong Yang

643 Is the present the key to the past? A global characterization of modern sedimentary basins
Björn Nyberg and John A. Howell

647 Spherulites as in-situ recorders of thermal history in lava flows
Kenneth S. Befus, James Watkins, James E. Gardner, Dominique Richard, Kevin M. Befus, Nathan R. Miller, and Donald B. Dingwell

651 Imaging high-pressure rock exhumation in eastern Taiwan
D. Brown, Y.-M. Wu, K.-F. Feng, W.-A. Chao, and H.-H. Huang

655 RESEARCH FOCUS: Flotation of magmatic minerals
Marie Edmonds
GEOLOGY publishes timely, innovative, and provocative articles relevant to its international audience, representing research from all fields of the geosciences.

GEOL OGY (ISSN 0091-7613 USPS 994-580 CODEN GLGYB) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to Geology, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2015 calendar year. GSA Members and Fellows: $89 (print + online), $89 (international print + online), $60 (online only). GSA Student and K–12 Teacher Members: $45 (print only; online included in membership). Nonmembers and institutions: $1075 (print + online). Details on subscription choices, formats, and pricing, at www.geosociety.org/pubs/. For all orders, call GSA Sales & Service at +1.888.443.4472 or +1.303.357.1000, or e-mail gsaservice@geosociety.org. Claims: for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

COVER: A cold-seep autogenic carbonate crust associated with worm tubes. The sample was collected during the 2011 E/V Nautilus field season in the Levantine basin of the Mediterranean Sea. See “A unique isotopic fingerprint of sulfate-driven anaerobic oxidation of methane” by Antler et al., p. 619–622.
