787  Relationship link between landward vergence in accretionary prisms and tsunami generation  
Nadaya Cubas, Pauline Souloumiac, and Satish C. Singh

791  Widespread dispersal and aging of organic carbon in shallow marginal seas  
Rui Bao, Cameron McIntyre, Meixun Zhao, Chun Zhu, Shuh-Ji Kao, and Timothy I. Eglington

795  Zipper junctions: A new approach to the intersections of conjugate strike-slip faults  
John P. Platt and Cees W. Passchier

799  Kimberlites and the start of plate tectonics  
R.J. Stern, M.I. Leybourne, and Tatsuki Tsujimori

803  Nanoscale deformation twinning in xenotime, a new shocked mineral, from the Santa Fe impact structure (New Mexico, USA)  
Aaron J. Cavosie, Pedro E. Montalvo, Nicholas E. Timms, and Steven M. Reddy

806  ERRATUM: The ancestors of meandering rivers  
Renato Paes de Almeida, André Marconato, Bernardo Tavares Freitas, and Bruno Boito Turra

807  Control of lithospheric inheritance on neotectonic activity in northwestern Canada?  
Pascal Audet, Christian Sole, and Andrew J. Schaeffer

811  Recycling in debris-filled volcanic vents  
A.H. Graettinger, G.A. Valentine, and I. Sonder

815  First terrestrial occurrence of tistarite (Ti₂O₃): Ultra-low oxygen fugacity in the upper mantle beneath Mount Carmel, Israel  

819  Tectonic settings of continental crust formation: Insights from Pb isotopes in feldspar inclusions in zircon  
Hélène Delavault, Bruno Dhuime, Chris J. Hawkesworth, Peter A. Cawood, Horst Marschall, and the Edinburgh Ion Microprobe Facility

823  The influence of vegetation on debris-flow initiation during extreme rainfall in the northern Colorado Front Range  

827  Modeling the oxygen isotope composition of the Antarctic ice sheet and its significance to Pliocene sea level  
Edward Gasson, Robert M. DeConto, and David Pollard

831  Abyssal origin for the early Holocene pulse of unradiogenic neodymium isotopes in Atlantic seawater  
Jacob N.W. Howe, Alexander M. Piotrowski, and Victoria C.F. Rennie

835  Development of cutoff-related knickpoints during early evolution of submarine channels  
Zoltán Sylvestre and Jacob A. Covault

839  Inside baleen: Exceptional microstructure preservation in a late Miocene whale skeleton from Peru  
Anna Gioncada, Alberto Collaretta, Karen Gariboldi, Olivier Lambert, Claudio Di Celma, Elena Bonaccorsi, Mario Urbina, and Giovanni Bianucci

843  How to make a transverse triple junction—New evidence for the assemblage of Goawanda along the Kaoko-Damara belts, Namibia  
Cees Passchier, Rudolph Trouw, and Renata da Silva Schmitt

847  Extensive Noachian fluvial systems in Arabia Terra: Implications for early Martian climate  
J.M. Davis, M. Balmé, P.M. Grindrod, R.M.E. Williams, and S. Gupta

851  In situ observations of earthquake-driven fluid pulses within the Japan Trench plate boundary fault zone  
Patrick M. Fulton and Emily E. Brodsky

855  The origin of Earth’s first continents and the onset of plate tectonics  
Alan R. Hastie, J. Godfrey Fitton, Geoffrey D. Bromiley, Ian B. Butler, and Nicholas W.A. Odlung

859  Criticality in the planform behavior of the Ganges River meanders  
P.A. Carling, N. Gupta, P.M. Atkinson, and Huang Qing He

863  Wyoming on the run—Toward final Paleoproterozoic assembly of Laurentia  
Taylor M. Kilian, Kevin R. Chamberlain, David A.D. Evans, Wouter Bleecker, and Brian L. Cousins

867  Experimental evidence that clay inhibits bacterial decomposers: Implications for preservation of organic fossils  
Sean McMahon, Ross P. Anderson, Erin E. Saupe, and Derek E. G. Briggs

871  Detecting magma-poor orogens in the detrital record  
G.J. O’Sullivan, D.M. Chew, and S.D. Samson

875  The mechanism of partial rupture of a locked megathrust: The role of fault morphology  
Qiang Qiu, Emma M. Hill, Sylvain Barbot, Judith Hubbard, Wanpeng Feng, Eric O. Lindsey, Lujia Feng, Keren Dai, Sergey V. Samsonov, and Paul Tapponnier

879  RESEARCH FOCUS: The great climate paradox of ancient Mars  
Brian Hynek

880  Statement of Ownership
GEOLOGY publishes timely, innovative, and provocative articles relevant to its international audience, representing research from all fields of the geosciences.

GEOLOGY (ISSN 0091-7613 USPS 994-580 CODEN GLGYb) is published monthly by the Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado, USA. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to Geology, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA.

Copyright not claimed on content prepared wholly by U.S. government employees within the scope of their employment. Individual scientists are hereby granted permission, without fees or further requests to GSA, to use a single figure, a single table, and/or a brief paragraph of text in other subsequent works and to make unlimited photocopies of items in this journal for noncommercial use in classrooms to further education and science. In addition, an author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages. For any other form of capture, reproduction, and/or distribution of any item in this journal by any means, contact: Permissions, GSA, P.O. Box 9140, Boulder, CO 80301-9140, USA, fax +1-303-357-1073, editing@geosociety.org. Reference: Geology, ISSN 0091-7613. Permission is granted to authors to post the abstracts only of their articles on their own or their organization's Web site providing the posting includes this reference: "The full paper was published in the Geological Society of America's journal Geology, [include year, month, and page numbers, if known, where the article appears or will appear]."

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2016 calendar year: GSA Members and Fellows: $89 (print + online), $69 (international print + online), $60 (online only). GSA Student, K-12 Teacher, and Early Career Professional Members: $45 (print only; online included in membership). Nonmembers and Institutions: $1125 (print + online). Details on subscription choices, formats, and pricing, at www.geosociety.org/pubs. For all orders, call GSA Sales & Service at 1-888-443-4472 or +1-303-357-1000, or e-mail gsservice@geosociety.org. Claims for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

COVER: February 2015 Landsat 8 OLI/TIRS satellite image (scale: 1:230,000) of the lower part of the Ganges River (India-Bangladesh) showing the development of shorter cut-off channels across the inside of meander bends, such that the older channels are being abandoned. The abandoned channels and the active channels depict the oscillating behavior of the wandering river over space and time. Flow direction is top-right to bottom-left. See “Criticality in the planform behavior of the Ganges River meanders” by Carling et al., p. 859–862.

Cover design by: Heather L. Sutphin
