Sedimentary and Volcanic Rocks

- Basalt scoria deposits:
- Olivine basalt lava flows:
- Pyroclastic basalt lava flows:
- Scoria flows:
- Pyroclastic flows:
- Tuffaceous sandstone:
- Volcanic breccia:
- Playa deposits:
- Gravel deposits:
- Angular basalt cobble to boulder-sized clasts sourced up slope.
- Formed by erosion of Miocene granite.

- Pliocene-Miocene Quaternary contact:
- Mafic lava flows:
- Basaltic dikes:
- Basaltic dikes:
- Basaltic dikes:
- Basaltic dikes:
- Continental crustal basement:
- Jurassic-Cretaceous basement:
- Jurassic-Cretaceous basement:
- Late Cretaceous basement:

Faults

- Strike-slip fault:
- Normal fault:
- Reverse fault:

Dikes

- Diagonal dikes:
- Strike and dip of bedding:
- Strike and dip of flow fabric:
- Strike and dip of foliation:

Samples

- 40Ar/39Ar age:
- Adopted:
- Adopted:
