EXPLANATION

Normal fault

Range bounding fault (50-1300 m of throw since Pliocene)

Small offset fault (10-160 m of throw since Pliocene)

Solid where certain and exact location accurate (=10 m), dashed where approximately located (±20 m),
dotted where concealed. Ball on hanging wall of faults in bedrock, hatchure on hanging wall where unconsolidated Quaternary sediments cover the base of footwall.

Range bounding fault (~50-1300 m of throw since Pliocene)

Small offset fault (~10-160 m of throw since Pliocene)

Structural domain boundary

Base: USGS Digital Orthophotoquadrangles

APPROXIMATE MEAN DECLINATION, 2006

118.50°

37.85°
