Explanation:

Background image:
Mosaic of orthorectified Landsat Thematic Mapper data (bands 2,3,4/R,0,8) from USGS Seamless Data Distribution System. Green vegetation displayed in hues of blue.

Vectorized ASTER-derived mineralogic information:
- Green: Carbonate (oligokite and dolomite)
- Red: Quartz

Ore deposit information:
- Small squares: Carlin-type sediment-hosted disseminated gold
- Small circles: Pluton-related, disseminated
- Small plus signs: Epithermal
- Small triangles: Orogenic veins
- Small stars: Volcanogenic massive sulfide (VMS)
- Small diamonds: Sedimentary exhalative (SEDEX)
- Small crosses: Hot springs

Commodity color codes for deposits:
- Gold (Au)
- Copper (Cu)
- Silver (Ag)
- Manganese (Mn)
- Molybdenum (Mo)
- Zinc or Sn (Zn or Sn)
- Tungsten (W)
- Barite (Ba)
- Vanadium (V)
- Mercury (Hg)
- Antimony (Sb)
- Iron (Fe)
- Bismuth (Bi)
- Fluorine (F)
- Polymetallic
