Themed Articles

GEOTHERMAL ENERGY FROM SEDIMENTARY BASINS: CHALLENGES, POTENTIAL, AND WAYS FORWARD

1651 Integrating geophysical data in GIS for geothermal power prospecting
Anna Crowell and Will Gosnold

HUMAN DIMENSIONS IN GEO SCIENCE

1680 Factors influencing non-expert term usage during a disaster: An analysis of the 2004 Indian Ocean tsunami
Xai Her, Ellen K. Buelow, and Scott K. Clark

EXPLORING THE DEEP SEA AND BEYOND, VOLUME 2

1689 Latest Quaternary sedimentation in the northern Gulf of Mexico Intraslope Basin Province: I. Sediment facies and depositional processes
John E. Damuth and Hilary Clement Olson

CREVOLUTION 2: ORIGIN AND EVOLUTION OF THE COLORADO RIVER SYSTEM II

1719 Detrital zircon U-Pb provenance of the Colorado River: A 5 m.y. record of incision into cover strata overlying the Colorado Plateau and adjacent regions
David L. Kimbrough, Marty Grove, George E. Gehrels, Rebecca J. Dorsey, Keith A. Howard, Oscar Lovera, Andres Aslan, P. Kyle House, and Philip A. Pearthree

Current Issue Articles

1749 Detrital-zircon geochronology and provenance of the Odocoely synorogenic clastic wedge, and Ordovician accretion of the Argentine Precordillera terrane
William A. Thomas, Ricardo A. Astini, Paul A. Mueller, and William C. McClelland

1770 Hornbrook Formation, Oregon and California: A sedimentary record of the Late Cretaceous Sierran magmatic flare-up event
Kathleen D. Surpless

1790 Application of detrital zircon U-Pb geochronology to surface and subsurface correlations of provenance, paleodrainage, and tectonics of the Middle Magdalena Valley Basin of Colombia

1812 Structure and metamorphism beneath the obducting Oman ophiolite: Evidence from the Bani Hamid granulites, northern Oman mountains
M.P. Searle, D.J. Waters, J.M. Garber, M. Rioux, A.G. Cherry, and T.K. Ambrose

1837 40Ar/39Ar ages of muscovites from modern Himalayan rivers: Himalayan evolution and the relative contribution of tectonics and climate
Peter Copeland, Guillaume Bertrand, Christian France-Lanord, and Kurt Sundell

1860 Australia going down under: Quantifying continental subduction during arc-continent accretion in Timor-Leste
Garrett W. Tate, Nadine McQuarrie, Douwe J.J. van Hinsbergen, Richard B. Bakker, Ron Harris, and Haishui Jiang

1884 Validation of meter-scale surface faulting offset measurements from high-resolution topographic data

1902 An ignimbrite caldera from the bottom up: Exhumed floor and fill of the resurgent Bonanza caldera, Southern Rocky Mountain volcanic field, Colorado
Peter W. Lipman, Matthew J. Zimmerer, and William C. McIntosh

1948 Kinematics of shallow backthrusts in the Seattle fault zone, Washington State
Thomas L. Pratt, Kathy G. Troost, Jack K. Odum, and William J. Stephenson

1975 Polyphase Proterozoic deformation in the Four Peaks area, central Arizona, and relevance for the Mazatzal orogeny
Calvin A. Mako, Michael L. Williams, Karl E. Karlstrom, Michael F. Doe, David Powicki, Mark E. Holland, George Gehrels, and Mark Pecha

1996 Paleostress directions near two low-angle normal faults: Testing mechanical models of weak faults and off-fault damage
Gary J. Axen, Amy Luther, and Jane Silverstone

2015 Rates and patterns of surface deformation from laser scanning following the South Napa earthquake, California
Stephen B. DeLong, James J. Lienkaemper, Alexandra J. Pickering, and Nikita N. Avdievitch

2031 Photogrammetric digital outcrop reconstruction, visualization with textured surfaces, and three-dimensional structural analysis and modeling: Innovative methodologies applied to fault-related dolomitization (Vajont Limestone, Southern Alps, Italy)
Andrea Bistacchi, Fabrizio Balsamo, Fabrizio Storti, Mahtab Mozafari, Rudy Swennen, John Solum, Christian Tueckmantel, and Conxita Taberner

2049 How does the connectivity of open-framework conglomerates within multi-scale hierarchical fluvial architecture affect oil-sweep efficiency in waterflooding?
Naum I. Gershenzon, Mohamad Reza Soltanian, Robert W. Ritz Jr., David F. Dominic, Don Keefer, Eric Shaffer, and Brynne Storsved

2067 A 6600 year earthquake history in the region of the 2004 Sumatra-Andaman subduction zone earthquake
Jason R. Patton, Chris Goldfinger, Ann E. Morey, Ken Ikehara, Chris Romsos, Joseph Stoner, Yusuf Djaadjahardja, Udrek, Sri Ardhyaastuti, Eddy Zulkarnaen Gaffar, and Alexis Vizcaino

COMMENT

2130 Rates of river incision and scarp retreat in eastern and central Grand Canyon over the past half million years: Evidence for passage of a transient knickzone
Ryan Crow, Karl Karlstrom, Laura Crosse, Richard Young, Michael H. Ort, Yemane Asmerom, Victor Polyak, and Andrew Darling

ERRATUM

2132 Rhyolites—Hard to produce, but easy to recycle and sequester: Integrating microgeochemical observations and numerical models
I.N. Bindeman and A.G. Simakin
This beautiful image, taken on 11 January 2001, shows a geological formation in the Maur Adrar Desert in Mauritania, Africa. Known as the “Richat Structure,” this snail-shell-like formation was created when a volcanic dome hardened and gradually eroded, exposing onion-like layers of rock.

Credit: Image taken by the Landsat-7 satellite.
