THEMED ISSUE: Subduction Top to Bottom 2

983 Quaternary coral reef complexes as powerful markers of long-term subsidence related to deep processes at subduction zones: Insights from Les Saintes (Guadeloupe, French West Indies) Frédérique Leclerc and Nathalie Feuillet

1008 Identification, classification, and interpretation of boninites from Anthropocene to Eoarchean using Si-Mg-Ti systematics Julian A. Pearce and Mark K. Reagan

1038 Length scales and types of heterogeneities along the deep subduction interface: Insights from exhumed rocks on Syros Island, Greece Alissa J. Kotowski and Whitney M. Behr

THEMED ISSUE: Geologic Evolution of the Alaska Range and Environs

1066 Cretaceous to Miocene magmatism, sedimentation, and exhumation within the Alaska Range suture zone: A polyphase reactivated terrane boundary Jeffrey M. Trop, Jeff Benowitz, Ronald B. Cole, and Paul O’Sullivan

Current Issue Articles

1102 Detrital zircons and sediment dispersal from the Coahuila terrane of northern Mexico into the Marathon foreland of the southern Midcontinent William A. Thomas, George E. Gehrels, Timothy F. Lawton, Joseph I. Satterfield, Mariah C. Romero, and Kurt E. Sundell

1128 Regional correlation of the Sonsela Member (Upper Triassic Chinle Formation) and detrital U-Pb zircon data from the Sonsela Sandstone bed near the Sonsela Buttes, northeastern Arizona, USA, support the presence of a distributive fluvial system Adam D. Marsh, William G. Parker, Daniel F. Stockli, and Jeffrey W. Martz

1164 Late Cenozoic structure and tectonics of the southern Sierra Nevada–San Joaquin Basin transition, California Jason Saleeby and Zorka Saleeby

1206 Dextral, normal, and sinistral faulting across the eastern California shear zone–Mina deflection transition, California–Nevada, USA Kevin DeLano, Jeffrey Lee, Rachelle Roper, and Andrew Calvert

1240 Syn-collisional exhumation of hot middle crust in the Adirondack Mountains (New York, USA): Implications for extensional orogenesis in the southern Grenville province S.P. Regan, G.J. Walsh, M.L. Williams, J.R. Chianelli, M. Toft, and R. McAleer

1291 High-resolution correlations of strata within a sand-rich clinothem using grain fabric data, offshore New Jersey, USA Grace I.E. Costgobe, David M. Hodgson, Nigel P. Mountney, and William D. McCaffrey

1323 Upper-plate deformation of Late Pleistocene marine terraces in the Trinidad, California, coastal area, southern Cascadia subduction zone J. Scott Padgett, Harvey M. Kelsey, and David Lamphear

1342 Deformation conditions during syn-convergent extension along the Cordillera Blanca shear zone, Peru Cameron A. Hughes, Micah J. Jessup, Colin A. Shaw, and Dennis L. Newell

1368 Magma-driven accommodation structures formed during sill emplacement at shallow crustal depths: The Maiden Creek sill, Henry Mountains, Utah Penelope I.R. Wilson, Ken J.W. McCaffrey, and Robert E. Holdsworth

1393 Workflow: From photo-based 3-D reconstruction of remotely piloted aircraft images to a 3-D geological model Reuben J. Hansman and Uwe Ring

1409 Distributed Neogene faulting across the western to central Arizona metamorphic core complex belt: Synextensional constriction and superposition of the Pacific–North America plate boundary on the southern Basin and Range John S. Singleton, Nikki M. Seymour, Stephen J. Reynolds, Terence Vomocil, and Martin S. Wong

COMMENT AND REPLY

1436 Alteration, mass analysis, and magmatic compositions of the Sentinel Bluffs Member, Columbia River flood basalts province: COMMENT Leslie L. Baker, Victor E. Camp, Stephen P. Reidel, Barton S. Martin, Martin E. Ross, and Terry L. Tolan

1448 Alteration, mass analysis, and magmatic compositions of the Sentinel Bluffs Member, Columbia River flood basalts province: REPLy Michael G. Sawlan

ERRATUM

1459 ERRATUM: Influence of the architecture of magma-poor hyperextended rifted margins on orogens produced by the closure of narrow versus wide oceans Pauline Chenin, Gianreto Manatschal, Suzanne Picazo, Othmar Müntener, Garry Karner, Christopher Johnson, and Marc Ulrich
In January 2018, Geosphere became an open access journal, and all papers published from January 2018 on are published under either the Creative Commons license CC-BY-NC or CC-BY (https://creativecommons.org/).

Papers published before January 2018 are freely accessible online, but copyright may apply. If you want to use material from Geosphere, please check the paper for its copyright or Creative Commons status. The following may apply to pre-2018 material:
