The Geological Society of America Bulletin is a leading international journal for major scholarly research in all branches of the earth sciences. Published continuously since 1890.

**TABLE OF CONTENTS**

**MARCH-APRIL 2021**

651 Muted cooling and drying of NW Mediterranean in response to the strongest last glacial North American ice surges
Maria Fernanda Sánchez Goñi, Tiffanie Fourcade, Sakani Salonen, Jonathan Lesven, Jaime Frigola, Didier Swingedouw, and Francisco Javier Sierro

661 Interpreting and reporting \(^{26}\text{Al}/^{27}\text{Al}\) geochronologic data

598 U-Pb detrital zircon ages of Cambrian-Ordovician sandstones from the Taeboeaksan Basin, Korea: Provenance variability in platform shelf sequences and paleogeographic implications
Moonsup Cho, Wonseok Cheong, W.G. Ernst, Yoonsup Kim, and Keewook Yi

515 Provenance of early Paleozoic sedimentary rocks in the Altyr Tagh orogen: Insights into the paleoposition of the Tarim craton in northern Gondwana associated with final closure of the Proto-Tethys Ocean
Qian Liu, Guochun Zhao, Jianhua L., Jinlong Yao, Yaguai Han, Peng Wang, and Toshiaki Tsuonega

522 Thermotectonic evolution of the Paleozoic granites along the Shandungan suture zone (Central China): Crustal growth and differentiation by magma underplating in an orogenic belt
Jiang-Feng Qin, Shao-Cong Lai, Xiao-Ping Long, Ze-Zhong Zhang, Yin-Juan Ju, Ren-Zhi Zhu, Xing-Ying Wang, Yong-Fei Li, Jiang-Bo Wang, and Tong Li

539 U-Pb zircon geochronology and depositional age models for the Upper Triassic Chinele Formation (Petrified Forest National Park, Arizona, USA): Implications for Late Triassic palaeoecological and palaeoenvironmental change
Cornelia Rasmussen, Roland Mundal, Randall B. Irms, Dominique Geisler, George E. Gehrels, Paul O. Chien, Dennis V. Kent, Christopher Lepre, Sean T. Kinney, John W. Geissman, and William G. Parker

559 Internal versus external locations of the South China Craton within Rodinia during the Cryogenian: Provenance history of the Nanhuai Basin
Guangyao Zhu, Huchuan Liu, Tingting Zhang, Weiyan Chen, Jianwei Xiao, Kun Zhao, and Huihui Yan

580 New age constraints on the duration and origin of the Late Ordovician Guttenberg \(^{87}\text{Sr}/^{86}\text{Sr}\) excursion from high-precision U-Pb geochronology of K-bentonites
J. Garradet Metzger, Jahandar Ramezani, Samuel A. Bowring, and David A. Fike

591 Himalayan Miocene adakitic rocks, a case study of the Mayum pluton: Insights into geochemical processes within the subducted Indian continental lithosphere and Himalayan mid-Miocene tectonic evolution
Chao Lin, Jianjiang Zhang, Xiaowian Wang, Tianli Huang, Bo Zhang, and Yunsong Fan

Jack J. Matthews, Alexander G. Liu, Chuan Yang, Duncan McInroy, Bruce Lavelle, and Daniel J. Condon

625 The amalgamation of Pangea: Paleomagnetic and geological observations revisited
Lei Wu, J. Brendan Murphy, Cecilia Guasada, Zhengxiang Li, John W.F. Waldron, Simon Williams, Sergei Pisarevsky, and William J. Collins

647 Boulders as a lithologic control on river and landscape response to tectonic forcing at the Mendocina triple junction
Charles M. Shobe, Georgina L. Bennett, Gregory E. Tucker, Kevin Roback, Scott R. Miller, and Joshua J. Roering

663 Neoproterozoic Amdo and Jiayuguan microblasts in the Tibetan Plateau: Implications for Rodinia reconstruction
Yiming Liu, Yuhua Wang, Sanchong Li, M. Santosh, Runhua Guo, and Shengyao Yu

679 Miocene high-temperature leucogranite magmatism in the Himalayan orogen
Peng Gao, Yong-Fei Zhang, Matthew Jason Mayne, and Zi-Fu Zhao

691 Oligocene-Neogene lithospheric-scale reactivation of Mesozoic terranes and Proto–Tethys evolution: Insights from the Lower Miocene range suture zone, southern Alaska, USA
Trevor S. Waldien, Sarah M. Roeseke, Jeffrey A. Benowitz, Evan Twelker, and Meghan S. Miller

713 Late Neoproterozoic–Early Paleozoic basin evolution in the Cathaysia Block, South China: Implications of spatial-temporal provenance changes on the paleogeographic reconstructions in supercontinent cycles
En-Kun Xue, Wei Wang, Mei-Fu Zhu, Mano K. Pandit, Si-Fang Huang, and Gui-Mei Lu

740 Facies interpretation and geochronology of diverse Eocene floras and faunas, northwest Chubut Province, Patagonia, Argentina
Justin Gosses, Alan R. Carroll, Benjamin T. Bruck, Brad S. Singer, Brian R. Jicha, Eugenio Aragon, Andrew P. Wallers, and Peter Wilf

753 Forarc magmatic evolution during subduction initiation: Insights from an Early Cretaceous Tibetan ophiolite and comparison with the Izu-Bonin-Mariana forearc
Jin-Gen Dai, Cheng-Shan Wang, Robert J. Stem, Kai Yang, and Jie Shen

772 Mesoproterozoic–Early Cretaceous provenance and paleogeographic evolution of the Northern Rocky Mountains: Insights from the detrital zircon record of the Bridger Range, Montana, USA
Chance B. Ronemus, Devon A. Orme, Saré Campbell, Sophie R. Black, and John Cook

802 Tectonic origin of the Baiminao arc terrane in the southern Central Asian orogenic belt: Evidence from sedimentary and magmatic rocks in the Damao region
Hai Zhou, Guochun Zhao, Yigu Han, Bo Wang, and Xianzhi Pei

819 Early–Middle Devonian brachiopod provincialism and bioregionalization at high latitudes: A case study from southwestern Gondwana
Cameron R. Penn-Clarke, and David A.T. Harper

837 Is volcanic ash responsible for the enrichment of organic carbon in shales? Quantitative characterization of organic-rich shale at the Ordovician-Silurian transition
Ke Zhao, Xuebin Du, Yongchao Lu, Fang Hao, Zhanhong Liu, and Jinxin Jia

849 From source to sink: Glacially eroded, Late Devonian algal “cysts” (Tasmanites) delivered to the Gulf of Mexico during the Last Glacial Maximum
Barry Kohl, B. Brandon Curry, and Merrell Miller

867 Kinematic and geodynamic evolution of the Isthmus of Panama region: Implications for Central American Seaway closure
Rebecca McGirr, Maria Seton, and Simon Williams

The impact of weathering upon the roughness characteristics of a splay of the active fault system responsible for the massive 2016 seismic sequence of the Central Apennines, Italy
Amerigo Corradetti, Miller Zambrano, Stefano Tavani, Emanuele Tondi, and Thomas Daniel Seers
Cover: Complex topography interacts with an anticlinal fold in stratified rocks of the Paleocene-Eocene Pabdeh Formation in the Lurestan area of Iran. The alternation of limestones and less competent marls and mudstones is highlighted by vegetation, while trees are aligned according to valleys perpendicular to the fold axis and likely following major fracture zones.
