The Environmental & Engineering Geophysical Society

Journal of Environmental & Engineering Geophysics

March 2006 Volume 11 Issue 1

Contents

C.L. Bray, N.C. Schaller, S.L. Iannopollo, M.D. Bostick, G. Ferrante, A. Fleming and J.P. Hornak
A Study of 1H NMR Signal from Hydrated Synthetic Sands 1

Seth S. Haines
Design and Application of an Electromagnetic Vibrator Seismic Source 9

Melvyn E. Best, Victor M. Leinson, Travis Ferbey and Doug McConnell
Airborne Electromagnetic Mapping for Buried Quaternary Sands and Gravels in Northeast British Columbia, Canada 17

Katherine Klein and Dragana Simon
Electromagnetic Properties of Cemented Paste Backfill 27

J. Scott Holladay, William E. Doll, Les P. Beard, James L.C. Lee and David T. Bell
UXO Time-Constant Estimation from Helicopter-Borne TEM Data 43

A. Ruffell, J.M. McKinley, C.D. Loyd and C. Graham
Th/K and Th/U Ratios from Spectral Gamma-Ray Surveys Improve the Mapped Definition of Subsurface Structures 53

Author Biographies 63

 Specifications:

Cal Specimen:
4 feet or 1.25 meters
Operational bandwidth:
1 to 16 KHz
Power:
Rechargeable Lithum battery or 3 AAs
Capable of acquiring from 1 to 3 frequencies

GSSI announces its newest EM instrument, the Profiler.
The Profiler is a rugged, user-friendly system that weighs only 9.9 pounds and features a wireless data connection between the PDA and instrument.

For geology, ground water, archaeology and environmental site assessment

Innovation at work ... from the Leader in Subsurface Imaging
