Contents
Baotong Liu
Applying an Adaptive Principal-component Extraction Algorithm in Seismic Data Processing 91
Esther L. Babcock, A. Peter Annan and John H. Bradford
Cable Effects in Ground-penetrating Radar Data and Implications for Quantitative Amplitude Measurements 99
Abdullatif A. Al-Shuhail and Ademola Adetunji
Joint Inversion of Ground-penetrating Radar and Seismic Velocities for Porosity and Water Saturation in Shallow Sediments 105
Widodo, Marcus Gurk and Bülent Tezkan
Multi-dimensional Interpretation of Radiomagnetotelluric and Transient Electromagnetic Data to Study Active Faults in the Mygdonian Basin, Northern Greece 121
Author Biographies 135
