The Journal of Foraminiferal Research is the official publication of the Cushman Foundation for Foraminiferal Research, 489 Brooke Rd., Fredericksburg, VA 22405. It continues the Contributions from the Cushman Laboratory for Foraminiferal Research, which were published from 1925 until 1950, and Contributions from the Cushman Foundation for Foraminiferal Research, which were published continuously from 1950 until 1970. JFR publishes original papers of international interest dealing with the Foraminiferida and allied groups of organisms. Review articles are encouraged.

INSTRUCTIONS FOR CONTRIBUTORS

INTRODUCTION

The Journal of Foraminiferal Research invites scholarly contributions dealing with all aspects of the foraminifera. It also welcomes those manuscripts which may only secondarily involve foraminifera as part of a stratigraphic or paleontologic study. All contributions published in the JFR must be of a general nature, but acceptance is the responsibility of the Editor.Manuscripts that do not conform to the instructions below will be returned to the author for further revision.

GENERAL INFORMATION

Authors must submit three copies of carefully checked typescript, complete with duplicates of all tables and illustrations. To ensure prompt acceptance, the manuscript should be in double spacing, with wide margins on all sides. It should be prepared on one side only of standard weight paper, 8.5 x 11 inches (21.6 x 27.9 cm) in size. Each page should be numbered in the upper right corner. It is expected that papers will be well organized and the results presented clearly and succinctly. Do not send original figures or plates until notification of final acceptance. Authors must use American spelling (e.g., labor not labour); word usage should conform to that used in standard dictionaries. Authors whose first language is not English should attempt to have their manuscripts proofread by native English speakers before submission. When in doubt about format and usage, authors should refer to a recent Journal issue.

TITLE PAGE

The title, author's name and mailing address (all double-spaced) should be centered on page one. Fully capitalized, the title should be brief but informative and should keep in mind the importance of key words for indexing and abstracting purposes. Running heads are placed below the author's names. Running heads are not to exceed a total of 80 characters and space, and all letters are capitalized. The running head (RH) is the running title and the left running head (LRH) is the name or names of the authors. Use “and others” for more than two authors. For example:

RH: MARTIN AND GOLDSTEIN (two authors)
LRH: MARTIN AND GOLDSTEIN (two authors)

ADDRESS

Addresses must be accurate and sufficient for postal delivery. Multiple authors should refer to an issue of the Journal for examples. Authors whose addresses are particularly detailed and complex should be prepared at the appropriate size, camera-ready for the Allen Press. Expense for correction of errors on address labels are charged at the normal cost of printing.

ABBREVIATIONS

Lengthy numerical, locality or taxonomic data subordinate to the text should be assembled into one or more separate, numbered appendices following the abstract.

TEXT

General instructions. Begin the text on page three. The primary, first-order headings should be fully capitalized and centered on page. Second-order headings, with initial lowercase, should be indented. The running head should begin above the line at the left margin and be underlined or italicized. Consult recent issues of the Journal for examples. In typing the manuscript, leave one inch of spaces between paragraphs. All tables and illustrations must be mentioned in the text and numbered in the order in which they appear. Each table should be kept to one page, and should designate the corresponding author to whom proofs should be sent. The corresponding author should also indicate their e-mail address.

ABSTRACT

The abstract should be centered on page two. It should outline concisely the principal conclusions and major conclusions of the paper. All new taxa should be mentioned. Literature citations or figure references should not appear in the abstract.

ILLUSTRATIONS

Photographs, artwork and drafting are expected to be of professional quality. Computer-generated illustrations should be examined critically and noted for quality, clarity, and economy of space. All illustrations must be in black and white, with high contrast and sufficient density. All line drawings should be planned for reproduction. Line drawings should be drawn on paper that is economical use of space. If possible, line drawings should be planned for single-column format. In total, the illustrations should be submitted at 7 x 8.12 inches (17.8 x 21.6 cm), or if convenient to be reduced to this size. The size of letters, numbers and symbols should be chosen with the final reduction in mind, as should magnification information in the caption. The illustration must be identified with its number and the author's name in the upper right corner. The numbering of the illustrations must correspond with their order of appearance in the text. Submit both copies of the illustrations separate from the text.

REFERENCES

Consult recent issues of the Journal for examples. The references should be arranged alphabetically and numbered. Authors are always listed with their last name first. After an initial reference, use a line in place of each name of authors of more than one publication. The initials, a c, etc., should be added to the date of works by the same author in the same year. Journal and book titles are capitalized. They may be complete and spelt out in full, or abbreviated (e.g., SSB, SSBA). Use et al. for more than three authors, authors whose first language is not English should attempt to have their manuscripts proofread by native English speakers before submission. When in doubt about format and usage, authors should refer to a recent Journal issue.

PAGE PROOFS AND REPRINTS

Page proofs, along with an order blank for reprints, will be sent directly to the author from the Allen Press. Proofs must be corrected and returned promptly to the Editor within 72 hours. If the corresponding author anticipates being absent when proofs are delivered, they should indicate their temporary mailing and e-mail addresses where proofs should be sent. Substantial changes in proof may be charged to the author. Reprint orders should be sent to the Allen Press, not to the Editor or the Secretary of the Cushman Foundation.

APPENDICES

All tables must be double-spaced on separate sheets, each labeled with the author's name and the table number in double-spaced, italics. Tables that are particularly detailed and complex should be prepared at the appropriate size, camera-ready for the Allen Press. Expense for correction of errors on original tables will be charged to the author.
