Volume 161, Part 2, March 2004

Hooker, J. J., Collinson, M. E. & Sille, N. P. Eocene–Oligocene mammalian faunal turnover in the Hampshire Basin, UK: calibration to the global time scale and the major cooling event

Compton, W. SIMS U-Pb zircon ages for the Upper Devonian Snobs Creek and Ceberean Volcanics from Victoria, with age uncertainty based on UO₂/UO₂ v. UO/U precision

Thomas, C. W., Graham, C. M., Ellam, R. M. & Fallier, A. E. ⁶⁷Sr/⁸⁶Sr chemostratigraphy of Neoproterozoic Dalradian limestones of Scotland: constraints on depositional ages and timescales

Murphy, J. R., Fernández-Suárez, H., Jeffries, T. E. & Strachan, R. A. U-Pb (LA-ICP-MS) dating of detrital zircons from Cambrian clastic rocks in Avalonia: erosion of a Neoproterozoic arc along the northern Gondwanan margin

Trombetta, A., Cribb, R., Courtois, F., Mazzeoli, P. & Pezzino, A. Mid-Ondovician U-Pb ages of porphyroids in the Paleoteterian Mountains (NE Sicily): palaeogeographical implications for the evolution of the Albian microplate

Guimerà, J., Mas, R. & Alonso, A. Intraplate deformation in the NW Iberian Chain: Mesozoic extension and Tertiary contractual inversion

Law, R. D., Seable, M. P. & Simpson, R. L. Strain, deformation temperatures and vorticity of flow at the top of the Greater Himalayan Slab, Everest Massif, Tibet

Talbot, C. & Aftabi, P. Geology and models of Qum Kuh, central Iran
Submission: Four complete copies of all scripts (two for Discussions) should be submitted by recorded delivery or registered post. You should also e-mail the abstract, which will be used by the editor for finding referees. Please send all illustrations (i.e. line drawings, photographs, etc.) to Mrs. A. Hills, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, BA1 3JN, UK (e-mail: angharad.hills@geolsoc.org.uk). Authors should also submit titles and abstracts of any related papers that they have in press or in the review process of other publications. These might be used during refereeing. Authors are invited to suggest three suitable referees (with e-mail addresses), but normally the editor uses a review by at least one referee not nominated by the author.

Papers on major topics of international interest in any of the Earth sciences are welcomed. Papers longer than 12 pages require special editorial approval. There are c. 1000 words on a printed page.

Specials: up to 4 printed pages on topical issues will be given priority for publication and be speeded through the reviewing and editing stages (see editorial, vol 144, p 367). The envelope should be clearly marked ‘Special’.

Papers are accepted on the understanding that they have not been submitted or published elsewhere and become copyright of the Geological Society. Papers are also accepted on the understanding that all authors consent to the submission.

Format: Papers will be typeset from the author’s disc. When your paper is accepted you will need to provide a Word or rich text format (.rtf) file. Typocheck should be double-spaced, including references, on one side of the paper only with a 25 mm margin on each side. All pages should bear the author’s name and be numbered serially. Text, figures and tables should be succinct. Figures should be kept to a minimum. Papers should be arranged as follows.

- Title and brief and specific, followed by name(s) and address(es) of authors (including e-mail address of corresponding author). Abstract: this must be intelligible without reference to the paper, and should not exceed 200 words (100 for ‘Specials’).
- Four or five keywords (to be chosen from the GeoRef online repository)
- Main body of paper: subdivided into 1st, 2nd and 3rd order headings
- Acknowledgements (if any)
- Appendices: see Supplementary Publications below
- References: in full (see below)
- Tables: each typed on a separate sheet (see below)

References: List all references cited. The author is responsible for ensuring that the references are correct. Reference in the text to a book means that two authors should be made thus: (Smith et al. 1978), but cited in full in the References. Do not abbreviate journal titles. Please key the authors’ names as Capitals and lower case. Use hyphens between page numbers and do not use commas in page numbers.

Line drawings: The top should be indicated. Drawings should have a line weight of 0.35 mm and lettering suitable for reduction to the type area of 236 × 176 mm or less. After reduction, the smallest capital lettering should not be less than 2 mm high. A metric scale should be included, and north point (and where relevant, coordinates of latitude and longitude, or National Grid) put on all maps.

Hand-drawn diagrams should be black on white card or opaque paper. Avoid line stippling and tints. Do not scan these yourself.

Photographs: Ensure that the quality of the copies with the submitted manuscript is adequate for the referees to make their assessment. Do not mount photographs on a black background. If you wish to scan slides or photographs in order to annotate them, the resolution should be 300 dpi at the intended final size. TIF, GIF and PICT files are acceptable for halftone illustrations (but rarely adequate for line drawings).

Colour and foldouts: These will be accepted only after consultation with the Editor. Authors are normally expected to contribute towards the cost of production. Estimates of cost can be obtained from the Staff Editor. The above instructions apply. Please ensure that colour files are to be saved as CMYK, not RGB. It is possible to include colour version of a black and white printed figure in the online version at no cost if the same file can be used. If a modified file is required, a small charge will be made.

Tables will be typeset and should be designed to go across the whole page in double column format. Authors should follow the style used in the Journal. Tables must be provided as Word, rich text format, Excel or comma delimited files.

Ptifiles may be ordered on the form provided at proof stage. Fifty free copies are supplied. You will also be sent instructions on how to obtain a PDF file.

Discussion of papers: 1000-word discussions on papers that have already appeared in the Journal as appropriate papers are acceptable. Two copies should be submitted with the title and author(s) of the paper discussed.

Supplementary Publications: Limited space in the Journal means that detailed material, such as locality lists and analytical data, will be made available as Supplementary Publications. These files are stored in hard copy at the British Library and the Society Library and can now be hosted on the Society’s website. Acceptable formats for the online repository are zip, gif and pdf. Maximum size in 5 MB per paper (can be zipped if necessary).

Enquiries: More information can be found at www.geolsoc.org.uk/jgs or contact Ms A. Hills at the above address.
