INSTRUCTIONS TO AUTHORS

Submission: Effective January 2004, all manuscripts are submitted via AllTracker, a web-based system for online submission. The web address is http://spot.colorado.edu/~jsedr/. Instructions are provided at that address. At your first visit, you will be prompted to establish a login and password. Then you will enter information about your manuscript (e.g., authors addresses, manuscript title, suggested reviewers, comments to the editor). Then you will upload the manuscript and figure files. They should be uploaded as individual files. Manuscript files can be uploaded as DOC, WPD, RTF, and TXT word-processing files. JPEG, TIFF, GIF, PDF, or EPS figure files can be submitted. Authors without access to the Internet can submit their manuscripts via mail (one hard copy and all text and figures on disk or CD-ROM) and the editorial staff will enter the files into the system for those authors.

CHECK THE JSR WEB SITE (http://spot.colorado.edu/~jsedr/) FOR FURTHER DETAILS AND ANY UPDATES REGARDING THE SUBMISSION PROCESS.

Many questions on formatting the manuscript and quoting various kinds of references may be answered by referring to recent issues of the journal on the Website: http://spot.colorado.edu/~jsedr/. The following topics provide general guidelines to be followed when submitting a manuscript for publication:

Title Page: Supply the following items, clearly differentiated, in the following order:
• Title, in all capital letters.
• Title Page:
• Please be careful to follow punctuation style, as in any recent issue. Note especially the use of commas in authors' names and year of publication, and the colon between title and source. Parenthetical citations in the text should not have a comma between author and year (Smith 1978; Jones 1990).
• All parts of multi-part figures (photos or line drawings) should be prepared with thin spaces (~1–2 mm) between them. All parts of multi-part figures (photos or line drawings) must have identifying Roman capital letters, at beginning of indented paragraph, followed by a period and three hyphens. In the text the word figure is capitalized and spelled out, e.g., Figure 1; it is capitalized and abbreviated when used parenthetically, e.g., (Fig. 1).

Preparation of Figures:
• For accepted manuscripts, submit computer-drafted clear prints of line figures. Use American-Style English in figures. Scale figures to the size at which you would want them published. We have three standard figure sizes: one-column (8.2 cm wide), two-column (18.4 cm wide), and two-column page (12.5 cm wide, on left, with captions on right if there is space). In Figure 1, the captions are embedded in the text. For information on how to produce the best computer-generated figures, refer to the colorized in Vol. 47, No. 5 (September 1997) or on our web site (see below). Lettering on figures should be large enough to be read from a distance of six feet.

Preparation of Title:
• All titles are in capital letters, all in a single paragraph, with first names then initials, spaced by numerical superscripts to correspond to authors' names. Leave generous margins, and do not use the font smaller than 10 pt. Non-native English speakers must have their manuscripts critiqued by a native English speaker prior to submission. In the text, first-order headings are BOLD CAPITALS CENTERED; second-order headings are Bold Roman Capitals and lowercase letters, beginning of indented paragraph, followed by a period and three hyphens. In the text the word figure is capitalized and spelled out; e.g., ‘Figure 1’, it is capitalized and abbreviated when used parenthetically, e.g., ‘Figure (1).’

Preparation of Tables:
• Supply the following items, clearly differentiated, in the following order:
• Table Title:
• All tables are in capital letters, all in a single paragraph, with first names then initials, spaced by numerical superscripts to correspond to authors' names. Leave generous margins, and do not use the font smaller than 10 pt. Non-native English speakers must have their manuscripts critiqued by a native English speaker prior to submission.

Preparation of References:
• Authors' names are in capital letters, all in a single paragraph, with first names then initials, spaced by numerical superscripts to correspond to authors' names.
• List of references, in capital and lowercase letters, superscripted to correspond to the list of authors (see masthead page). Then you will upload the manuscript and figure files. They should be uploaded as individual files. Manuscript files can be uploaded as DOC, WPD, RTF, and TXT word-processing files. JPEG, TIFF, GIF, PDF, or EPS figure files can be submitted.

Authors without access to the Internet can submit their manuscripts via mail (one hard copy and all text and figures on disk or CD-ROM) and the editorial staff will enter the files into the system for those authors.

INSTRUCTIONS FOR SUBMISSION:

Kinds of Contributions:
• Experimental Articles—Methodology, results, and implications for sedimentary geology.
• Research articles—Research results in any area of sedimentary geology.
• Current Ripples: Brief responses to papers, published with authors' reply.
• Discourses: Short, high-impact, provocative, data-supported papers on sedimentary geology. This type of article is generally limited to six printed pages of 6500 words.
• Perspectives: Articles dealing with more personal or opinion-oriented viewpoints on any aspect of sedimentary geology.

Inquiries: The Journal editorial office is open Monday–Friday 9:00 a.m.–5:00 p.m. (Rocky Mountain time). For fastest response, use e-mail, telephone, or FAX (see below).

For submission of manuscripts, see masthead page.
