RESEARCH ARTICLES

CARBONATE PLATFORM DYNAMICS
Sedimentary facies of Bora Bora, Darwin’s type barrier reef (Society Islands, South Pacific): the unexpected occurrence of non-skeletal grains
Eberhard Gischler

Investigating carbonate platform types: multiple controls and a continuum of geometries
Huw D. Williams, Peter M. Burgess, V. Paul Wright, Giovanna Della Porta, and Didier Granjeon

BEACH SYSTEMS AND CLIMATE
Decadal behavior of tidal inlet–associated beach systems, northwest Ireland, in relation to climate forcing
Marianne C. O’Connor, J. Andrew G. Cooper, and Derek W.T. Jackson

FLUVIAL SEDIMENTOLOGY
Sedimentary characteristics of the gravel–sand transition in the river Rhine
Roy Frings

INCISED VALLEY GEOMETRY
Quantitative modeling of the evolution and geometry of incised valleys
John Martin, Alessandro Cantelli, Chris Paola, Michael Blum, and Matthew Wolinsky
