CURRENT RIPPLES

Millennial-scale sequence stratigraphy: numerical simulation with Dionisos
Istvan Csato, Octavian Catuneanu, and Didier Granjeon

Late Cretaceous fluvial-megafan and axial-river systems in the southern Cordilleran foreland basin: Drip Tank Member of the Straight Cliffs Formation and adjacent strata, southern Utah, U.S.A.
Timothy F. Lawton, William L. Schellenbach, and Amy E. Nugent

RESEARCH ARTICLES

A fulcrum approach to assessing source-to-sink mass balance using channel paleohydrologic parameters derivable from common fluvial data sets with an example from the Cretaceous of Egypt
John Holbrook and Hamdalla Wanas

Large-scale bleaching of red beds related to upward migration of hydrocarbons: Los Chihuidos High, Neuquén Basin, Argentina
Ana L. Rainoldi, Marta Franchini, Daniel Beaufort, Patricia Patrier, Adolfo Giusiano, Agnes Impiccini, and Josefina Pons

Multiple dolomitization episodes in deep-water limestones of the Triassic Lagonegro basin (southern Italy): from early reflux to tectonically driven fluid flow
Tatyana Gabellone, Alessandro Iannace, and Marta Gasparrini
