

# Lithosphere

ISSN 1941-8264 | VOLUME 1 | NUMBER 1 | FEBRUARY 2009

*Lithosphere* aims to provide timely publication of interdisciplinary, multidisciplinary, and cross-disciplinary research in addition to disciplinary studies of broad tectonic interest.

## Contents

- 3** **Welcome to Lithosphere**  
James P. Evans, Jon D. Pelletier, and Raymond M. Russo
- 4** **Late Holocene surface ruptures on the southern Wairarapa fault, New Zealand: Link between earthquakes and the uplifting of beach ridges on a rocky coast**  
T.A. Little, R. Van Dissen, E. Schermer, and R. Carne
- 29** **A fluid factory in solid Earth**  
M. Santosh, S. Maruyama, and S. Omori
- 34** **Spatial and temporal variations in denudation of the Wasatch Mountains, Utah, USA**  
Greg M. Stock, Kurt L. Frankel, Todd A. Ehlers, Mirjam Schaller, Stephanie M. Briggs, and Robert C. Finkel
- 41** **Backward stacking of submarine channel-fan successions controlled by strike-slip faulting: The Izumi Group (Cretaceous), southwest Japan**  
Atsushi Noda and Seiichi Toshimitsu
- 60** **Arkansas crustal xenoliths: Implications for basement rocks of the northern Gulf Coast, USA**  
Dennis P. Dunn
