

# TABLE OF CONTENTS

Volume 20, No. 5    October, 2005

*Plant Taphonomy Special Issue*

---

## SPOTLIGHT

Sticks and Mud, Fruits and Nuts, Leaves and Climate: Plant Taphonomy Comes of Age  
*Carole T. Gee and Robert A. Gastaldo* 415

---

## INTRODUCTION

Plant Taphonomy: Ruminations on the Past, the Present, and the Future    *David K. Ferguson* 418

---

## RESEARCH REPORTS

The Sensitivity of CLAMP to Taphonomic Loss of Foliar Physiognomic Characters  
*Robert A. Spicer, Alexei B. Herman, and Elizabeth M. Kennedy* 429

Modern Tropical Forest Taphonomy: Does High Biodiversity Affect Paleoclimatic Interpretations?  
*Robyn J. Burnham, Beth Ellis, and Kirk R. Johnson* 439

Paleoecological Implications of Differential Biomass and Litter Production in Canopy Trees  
in Australian *Nothofagus* and *Eucalyptus* Forests  
*David C. Steart, David R. Greenwood, and Paul I. Boon* 452

The Genesis of Mass Carpological Deposits (Bedload Carpod deposits) in the Tertiary  
of the Lower Rhine Basin, Germany  
*Carole T. Gee* 463

Taphonomic Trends of Macrofloral Assemblages Across the Permian–Triassic Boundary,  
Karoo Basin, South Africa  
*Robert A. Gastaldo, Rose Adendorff, Marion Bamford, Conrad C. Labandeira,  
Johann Neveling, and Hallie Sims* 479

---

## RESEARCH LETTER

Leaf Margin Analysis: Taphonomic Constraints    *David R. Greenwood* 498

---

## BOOK REVIEWS

Cambro-Ordovician Studies I, Memoir 30 of the Association of Australasian Palaeontologists  
*Bruce S. Lieberman* 506

The Great Ordovician Biodiversification Event    *Phil Novack-Gottshall* 506
