TABLE OF CONTENTS

Volume 25, No. 11  November 2010

SPOTLIGHT
Newly integrated approaches to studying Late Triassic terrestrial ecosystems
Randall B. Irmis and Jessica H. Whiteside 689

RESEARCH ARTICLES
Environmental controls on the distribution of late Paleozoic bryozoan colony morphotypes: An example from the
Permian of Tasmania, Australia
Catherine M. Reid 692

Neotectonic study of the traces and burrowing behaviors of the western harvester ant Pogonomyrmex occidentalis
(Insecta: Hymenoptera: Formicidae): Paleopedologic and palieological implications
Alan E. Huffman and Stephen T. Hasiotis 703

Oxygen isotope and climatic control of Oxfordian coral reefs (Jurassic, Tethys)
Bertrand Martin-Garin, Bernard Lathuilière, Jørn Geister, and Karl Ramonez 721

Feeding traces associated with bird tracks from the Lower Cretaceous Huanan Formation, Republic of Korea
Amanda R. Falk, Stephen T. Hasiotis, and Larry D. Martin 730

Foremics on the half shell: A sclerochronological investigation of a modern biological invasion in San Francisco Bay,
United States
David H. Goodwin, Andrew N. Cohen, and Peter D. Rosmarin 742

Volume 25, No. 12  December 2010

RESEARCH ARTICLES
Middle Triassic coral growth bands and their implication for photosymbiosis
George D. Stanley, Jr. and Kevin P. Helms 754

Pelmatozoan echinoderms as colonizers of carbonate firmgrounds in mid-Cambrian high energy environments
Samuel Zamora, Sebastian Clausen, J. Javier Álvaro, and Andrew B. Smith 764

The influence of data selection and type of analysis on interpretations of temporal stability in Oligocene faunas of Mississippi
Cheryl C. Vaughey and Linda C. Ivany 769

Taphonomy of a juvenile lambeosaurine bonebed from the Two Medicine Formation (Campanian) of Montana, United States
Benjamin A. Schoene and David J. Varricchio 780

Origin of high productivity in the Pliocene of the Florida Platform: Evidence from stable isotopes and trace elements
Kai Tao and Ethan L. Grossman 796

Lingulide response to severe storms recorded in Middle Triassic strata of northeastern British Columbia
John-Paul Zonneveld and Sarah E. Greene 807

RESEARCH NOTE
Earliest record of dental pathogen discovered in a North American Eocene rabbit
Łucja Fostowicz-Frelik and Grzegorz J. Frelik 818

Taphonomic controls on Ediacaran diversity: Uncovering the holdfast origin of morphologically variable enigmatic structures
Lisa G. Tarhan, Mary L. Droser, and James G. Gehling 823

Did a volcanic mega-eruption cause global cooling during the Late Ordovician?
Achim D. Herrmann, Kenneth G. Macleod, and Stephen A. Leslie 831

Evidence of paludification in the early Middle Triassic (early Anisian) Voltzia Sandstone: The oldest post-Permian macroscopic
evidence of wildlife discovered so far
Dieter Uhl, André Jacqz, Thomas Schindler, and Michael Wattk 837

COVER EXPLANATION: The Ediacara Member of the Rawnsley Quartzite of South Australia contains abundant biogenic structures of
variable but distinct morphology, formed from the dragging or uprooting of a Charniodiscus-like frond through a microbially bound substrate
(see Tanaka et al., herein p. 823)
