CONTENTS

Articles

On the bidirectional relationship between geographic range and taxonomic duration
Michael Foote, James S. Crampton, Alan G. Beu, and Roger A. Cooper 421

Adjusting global extinction rates to account for taxonomic susceptibility
Steve C. Wang and Andrew M. Bush 434

Press-pulse: a general theory of mass extinction?
Nan Crystal Arens and Ian D. West 456

Modeling fluid flow in Medullosa, an anatomically unusual Carboniferous seed plant
Jonathan P. Wilson, Andrew H. Knoll, N. Michele Holbrook, and Charles R. Marshall 472

Establishing a framework for archosaur cranial mechanics
Emily J. Rayfield and Angela C. Milner 494

How to find a dinosaur, and the role of synonymy in biodiversity studies
Michael J. Benton 516

Stable isotope evidence for changes in dietary niche partitioning among hadrosaurian and ceratopsian dinosaurs of the Hell Creek Formation, North Dakota
Henry C. Fricke and Dean A. Pearson 534

Hierarchy and the reconstruction of evolutionary trends: evidence for constraints on the evolution of body size in terrestrial caniform carnivorans (Mammalia)
John A. Finarelli 553
