

CONTENTS

Preface	IV
Acknowledgements	V
Abstract	145
1. Introduction	147
1.1 Experimental Approach to the Sulfur Cycle	147
1.2 The Sulfur Cycle of Marine Sediments	148
2. My Personal and Scientific History	150
1.2 How it Began	150
2.2 Exploring the Ecology of the Sulfur Cycle	154
2.3 "The Mud Group" in Aarhus	158
2.4 The Max Planck Institute for Marine Microbiology	161
2.5 Back in Denmark	166
3. Sulfate Reduction	169
3.1 ³⁵ S Sulfate Reduction Rate (SRR) Measurements	169
3.2 Problems with the ³⁵ S Method	172
3.3 Reactive Transport Modelling	174

3.4	Reconciling Modelled and ³⁵ S Measured Sulfate Reduction Rates	176
3.4.1	Aarhus Bay coastal sediment	176
3.4.2	SE Atlantic continental slope	178
3.4.3	Measured versus modelled SRR	180
3.5	Cryptic Sulfur Cycling	181
3.6	Substrate Kinetics of Sulfate Reduction	182
3.7	Temperature Control of Sulfate Reduction	186
4.	Sulfide Oxidation	191
4.1	The Dynamic Surface Sediment	191
4.2	Sulfide Oxidation Experiments	193
4.3	Sulfide Oxidation Mechanisms	198
4.4	Big Sulfur Bacteria	199
4.5	Cable Bacteria	203
4.6	Chemoautotrophy and Dark CO ₂ Fixation	206
5.	Dynamics of Intermediate Sulfur Species	210
5.1	Elemental Sulfur and Polysulfides	211
5.2	Sulfur Oxyanions	213
5.3	Disproportionation of Thiosulfate	215
5.4	Disproportionation of Elemental Sulfur	219
5.5	Pathways of Pyrite Formation	221
6.	Sediment Mineralisation Processes	223
6.1	Age Control of Turnover Rates	223
6.2	Pathways of Anaerobic Mineralisation	226
6.3	The “Redox Cascade”	231
7.	Interactions with the Methane Cycle	236
7.1	The Methanic Zone	237
7.2	Controls on Methane Production	239
7.2.1	The local scale	239
7.2.2	The regional scale	242
7.2.3	The global scale	244
7.3	Quantitative Role of Methane for Sulfate Reduction	245
7.4	Processes at the Sulfate-Methane Transition (SMT)	246
7.5	Anaerobic Oxidation of Methane (AOM)	249
8.	Stable Sulfur Isotopes	251
8.1	The Mechanisms of Isotope Fractionation	251
8.2	Controls on Isotope Fractionation	252
8.3	Stable Isotopes and Open System Diagenesis	255
8.4	The Sulfidisation Front	257

9.	The Sulfur Cycle – From Coast to Deep Sea	262
9.1	Organic Carbon Cycle of the Global Seabed	262
9.2	The Different Depth Regions	264
9.3	Role of Methane.	267
9.4	Global Sulfur Budget of Marine Sediments	269
10.	Future Perspectives	272
	References	276
	Index	304
