**LEXICON OF OMAN**

Subsurface Stratigraphy

G.A. Forbes, H.S.M. Jansen and J. Schreurs

“The rock units presented in this Lexicon represent one of the most unique and complete records of the Earth’s Phanerozoic Eon and Neoproterozoic Era. Most of them, and many more such as the Semail Ophiolite Complex and Neo-Tethyan Rift System, can be visited in the spectacular outcrops of the Sultanate of Oman.”
