The Quarterly Journal of Engineering Geology and Hydrogeology is published by the Geological Society and is an established journal with a circulation of 4000 in 47 countries. Papers are invited from, and about, all areas of the world on engineering geology and hydrogeology topics including all relevant aspects of the approach of geology to civil engineering, mining practice and water resources. This includes but is not limited to: applied geophysics, engineering geomorphology, environmental geology, hydrogeology, groundwater quality, contaminated land, waste management, land use planning, geotechnics, rock mechanics, soil mechanics, geomaterials and geological hazards. The journal includes the prestigious Glossop and Ineson lectures, research papers, case histories, review articles, technical notes, photographic features, discussions, book reviews and periodic reports.

The Geological Society of London was founded in 1807, and is the oldest geological society in the world. It received its Royal Charter in 1825 and is now Britain's national society for geology. Both a learned society and a professional body, the Geological Society is recognized by the Department of Trade and Industry (DTI) as the chartering authority for geoscience, able to award Chartered Geologist status upon appropriately qualified Fellows. Fellows of the Geological Society are entitled to a free subscription to the Quarterly Journal of Engineering Geology and Hydrogeology. Further information: email: membership@geolsoc.org.uk; http://www.geolsoc.org.uk; tel: +44 (0) 207 434 9944. The Society is a Registered Charity, no. 210161.
