CONTENTS – Volume 42, Part 4, November 2009

Review Article

The Ninth Glossop Lecture
Introduction
I. Hodgson 395

Geology; its principles, practice and potential for Geotechnics
M. H. de Freitas 397

Engineering Geology in Geotechnical Risk Management

Introduction to Engineering geology in geotechnical risk management
S. Parry 443

Landslide risk assessment: the challenge of estimating the probability of landsliding
E. M. Lee 445

Qualitative risk assessment of catchwaters in Hong Kong based on simplified geomorphological hazard mapping
R. P. Martin 459

Geomorphological landslide models for hazard assessment: a case study at Cloudy Hill, Hong Kong
D. M. Devonald, J. A. Thompson, S. R. Hencher & H. W. Sun 473

The use of pore pressure reinflation testing in landslide management in Hong Kong
K. Y. Ng & D. N. Petley 487

Engineering geology and the reduction of geotechnical risk: challenges facing the profession in Hong Kong
S. Parry & J. R. Hart 499

Engineering geology in the management of roadside slope failures: contributions to best practice from Bhutan and Ethiopia
G. J. Hearn & C. I. Massey 511
