CONTENTS – Volume 47, Part 1, February 2014

Editorial
E. Bromhead & T. Dijkstra

The 22nd Ineson Lecture
Hydrogeological challenges in a low-carbon economy
P.L. Younger

Research Articles
A new appraisal of the Ancona landslide based on geotechnical investigations and stability modelling
A. Agostini, V. Tofani, T. Nolesini, G. Gigli, L. Tanteri, A. Rosi, S. Cardellini & N. Casagli

Chemical performance of stabilized/solidified zinc-contaminated soil

Analytical method for stagnation point calculation: theoretical developments and application to a hydraulic barrier design (Sicily, Italy)
L. Colombo & V. Francani

Groundwater conceptual models: implications for evaluating diffuse pollution mitigation measures

Sulphur springs of the Craven Basin, NW England: indicators of natural methane leakage?
P.J. Murphy, S.H. Bottrell & K. Parker

Characteristics of karst springs in Aydıncık (Mersin, Turkey), based on recession curves and hydrochemical and isotopic parameters
Z. Hatipoglu-Bagci & M.S. Sazan

Technical Note
Factors influencing unit weight and strength of lightweight cemented clay
S. Horpibulsuk, A. Wijitchot, A. Nerimitknornburee, S.L. Shen & C. Suk siripattanapong

Book reviews

Words by Dr Tom Dijkstra, image by Dr Mike Winter who are grateful to Professor X Meng of the Lanzhou University who hosted their visit to Gansu in September 2012.
