Contributions to Geology

CONTENTS

Page

Bone Strontium as a Dietary Indicator in Human Skeletal Populations
Antoinette B. Brown

A Flamingolike Wader from the Eocene of Wyoming
Alan Feduccia and Paul O. McGrew

Significance of Thin Carbonates in Interpreting the Depositional Environments of Thick Clastic Sequences
E. F. Pearson and J. H. Hanley

Coprolites of White River (Oligocene) Carnivorous Mammals: Origin and Paleoenecologic and Sedimentologic Significance
Paul Edwards and Daniel Yatkola

Examination of Selected Postcranial Elements in Pleistocene Camelids
John Breyer

BOOK REVIEWS: Sedimentary Structures of Ephemeral Streams
by M. Dane Picard and Lee R. High reviewed by
James R. Steidtmann and The Innocent Assassins
by Loren Eiseley reviewed by Paul Edwards

COVER: Presbyornis pervetus Wetmore and some friends wet their feet in Eocene Lake Gosiute; see page 49.

CONTRIBUTORS should submit manuscripts typed double-spaced in duplicate. All manuscripts should conform to the usage of the Geological Society of America Bulletin except that we list in the order: title, authors, abstract, text. All illustrations are called Figures. Do not use magnifications in caption, but rather, insert a bar scale in metric units into the illustration. Systematic paleontology should be in the style of the Journal of Paleontology. Captions for figures, footnotes, tables, etc. should be typed on separate sheets and not inserted in the text. Page charges of $5 per page will be assessed for all articles published. A total of 50 reprints with covers will be supplied free, and additional ones may be ordered prior to publication.

ADDRESS MANUSCRIPTS to Ronald B. Parker, Editor, Contributions to Geology, P. O. Box 3006, Laramie, WY 82071, U. S. A.

SUBSCRIPTION and related matters may be addressed to Circulation Dept. at the above address.
