Application of magnetic geothermometers in sedimentary basins: an example from the Western Karoo Basin, South Africa
L.P. Maré, M.O. de Kock, B. Cairncross and H. Mouri .................................................. 1-14

Origin of tanzanite and associated gemstone mineralization at Merelani, Tanzania
C. Harris, W. Hlongwane, N. Gule, and R. Scheepers .................................................. 15-30

Low-P-high-T metamorphism of the Aggeneys terrane, Namaqua Metamorphic Complex, South Africa
J.F.A. Diener .................................................................................................................. 31-44

Provenance of the neoproterozoic rocks of the Gifberg Group (Western South Africa)
A. Van Staden, U. Zimmermann, J. Gutzmer and G.J.B. Germs .................................. 45-66

Amphibolites of the Central Zone: New SHRIMP U-Pb ages and implications for the evolution of the Damara Orogen, Namibia
L. Longridge, J.A. Kinnaird, R.L. Gibson and R.A. Armstrong .................................. 67-86

Mine water footprint in the Johannesburg area, South Africa: analysis based on existing and measured data
T.A. Abiye ..................................................................................................................... 87-96

Groundwater as a viable resource under climate change in the Nile Basin: a rapid hydrogeological assessment
T.A. Abiye and P. Mmayi ............................................................................................... 97-108

Geographical controls on sediment accretion of the Cenozoic Algoa Group between Oyster Bay and St. Francis, Eastern Cape coastline, South Africa
D. Claassen .................................................................................................................. 109-128

Geochemistry and heavy minerals analyses on “Black Sands” of the lower Cambrian Fish River Subgroup (Nama Group, Namibia)
G. Blanco, P. Abre, H.M. Rajesh and G.J.B. Germs .................................................. 129-148

Anatexis of juvenile mafic to intermediate crust – Constraints from major and trace element and Sr, Nd, Pb isotopes of diorites to granites (Damara Orogen, Namibia)
S. Jung, J. Berndt, A. Stracke, F. Hauff and N. Kastek ............................................. 149-171
