### Special section: Near-surface geophysics

138 Introduction to this special section: Near-surface geophysics, R. Miller and G. Baker

140 Inversion of time-lapse electrical resistivity imaging data for monitoring infiltration, V. Mitchell, R. Knight, and A. Pidlisecky

146 Hammer seismic reflection imaging in an urban environment, L. Liberty

154 The geological Hubble: A reappraisal for shallow water, M. Vardy, J. M. Bull, J. K. Dix, and T. J. Henstock, R. Plets, M. Gutowski, and P. Hogarth

160 Evaluating the quality of cement-soil mixing piles by inversion of surface waves, J. Liu, Y. Xi, N. Qu, and X. Wang

164 Near-surface, downhole shear-wave surveys: A primer, D. Crice

172 Geophysical mapping of the Hockley growth fault in northwest Houston, USA, and recent surface observations, M. Saribudak

182 High-resolution shallow geophysics and geology in the Hudson-Raritan Estuary Ecosystem Restoration, New Jersey, W. Murphy III, W. Bruce Ward, B. Boyd, G. Fleming, W. Murphy IV, R. Nolen-Hoeksema, M. Art, and D. Rosales

192 Unique applications of MMR to track preferential groundwater flow paths in dams, mines, environmental sites, and leach fields, V. Kofoed, M. Jessop, M. Wallace, and W. Qian
