### Table of Contents

380...... Automated extraction of fracture network from 3D poststack seismic data for fracture and fault characterization and modeling, M.-V. Thachaparambil, R. Wu, D. Wang, P. Xu, R. Zeng, and Z. Zhu

386...... Geomechanical and geometric seismic attributes in an interpretation workflow for characterization of unconventional reservoirs, E. Trinchero, L. Vernengo, and J. Cardoso

394...... An image-based effective-medium modeling of near-surface anomalies, O. Yilmaz

402...... Interpreter’s Corner: Volumetric estimates of seismic reflector rotation and convergence—tools for mapping rotation about faults and seismic stratigraphy, S. Chopra and K. Marfurt

410...... Meter Reader: Tutorial: The gravity-stripping process as applied to gravity interpretation in the eastern Mediterranean, B. Miroslav, R. Michael, and L. Michael

**Special section: Marine and offshore technology**

418...... An introduction to this special section: Marine and offshore technology, D. Clark

420...... Seismic-derived seabed topography: Insights from the outer fold and thrust belt in the deep-water Niger Delta, B. Jibrin, T. Reston, and G. Westbrook

424...... Application of volumetric seismic discontinuity attribute for fault detection: Case study using deep-water Niger Delta 3D seismic data, B. Jibrin, T. Reston, and G. Westbrook

430...... A simplified workflow for accurate time-to-depth conversion using 3D grid tomography, F. Mancini

436...... Full tensor CSEM and MT for subsalt structural imaging in the Red Sea: Implications for seismic and electromagnetic integration, D. Colombo, G. McNeice, E. Sandoval Curiel, and A. Fox

450...... Comparison of surface and shipborne gravity data with satellite-altimeter gravity data in Hudson Bay, P. Keating and N. Pinet
